Bagheri, Behnam Bohluli, Mohammad Hosein Amirzade-Iranaq, 2021-06-01 Physical attractiveness of the face has a significant impact on the social life and daily interaction of individuals as well as one's general perception of life Proper surgical planning for aesthetic facial surgery requires a meticulous analysis of the patient's

current and desired facial features from the perspective of both soft and hard tissues. Significantly greater changes to facial aesthetics can be made via the alteration of the main bony structures of the face than by alteration of soft tissue and skin alone. Various surgical and clinical techniques are available for the augmentation, reduction, or refinement of the most prominent aspects of facial aesthetics, such as alterations to the cheek, chin, nose, paranasal area, as well as the angle of the jaw. These techniques can be categorized as office-based or non-invasive techniques (filler injections, facial liposculpture, or liposuction) to modify the soft tissue of the face, and invasive surgical interventions such as facial prosthesis and maxillofacial osteotomies. In order to achieve the optimum aesthetic results for patients who undergo bi-maxillary or mono-maxillary orthognathic surgery, it is of paramount importance to utilize a hard and soft tissue integrated approach. These integrated approaches have utilized the latest techniques in 3-dimensional printing, computer-assisted surgery, tissue engineering, and stem cell therapy in order to achieve positive and lasting outcomes.

Integrated Procedures in Facial Cosmetic Surgery includes chapters that focus on facial analysis and clinical evaluation and best practices in surgical techniques, such as principles of bone contouring, genioplasty, mentoplasty, malarplasty, rhinoplasty, orthognathic surgery, and intra-oral plastic surgery, lifting procedures like blepharoplasty, surgical approaches to cleft lip and palate surgery, as well as the principles of facial photography. Written by a team of renowned international experts, this textbook features over 900 original photographs fully illustrating each procedure in a stepwise manner. *Integrated Procedures in Facial Cosmetic Surgery* is an essential companion for oral and maxillofacial surgeons, plastic surgeons, and otolaryngologists, as well as for cosmetic surgeons and clinical residents dealing with face rejuvenation. Its contents will also be of interest to dentists, prosthodontists, periodontists, radiologists, general surgeons, and dermatologists.
