*Designing Urban Transformation* Aseem Inam,2013-10-23 While designers possess the creative capabilities of shaping cities their often singular obsession with form and aesthetics actually reduces their effectiveness as they are at the mercy of more powerful generators of urban form In response to this paradox *Designing Urban Transformation* addresses the incredible potential of urban practice to radically change cities for the better The book focuses on a powerful question What can urbanism be by arguing that the most significant transformations occur by fundamentally rethinking concepts practices and outcomes Drawing inspiration from the philosophical movement known as Pragmatism the book proposes three conceptual shifts for transformative urban practice a beyond material objects city as flux b beyond intentions consequences of design and c beyond practice urbanism as creative political act Pragmatism encourages us to consider how we can make deeper and more systemic changes and how urbanism itself can be a design strategy for such transformations To illuminate how these conceptual shifts operate in vastly different contexts through analysis of transformative urban initiatives and projects in Belo Horizonte Boston Cairo Karachi Los Angeles New Delhi and Paris The book is a rare integration of theory and practice that proposes essential ways of rethinking city design and building processes while drawing critical lessons from actual examples of such processes

**Better Spending for Localizing Global Sustainable Development Goals** Fayyaz Baqir,Nipa Banerjee,Sanni Yaya,2019-11-05 This book centers around an intense debate among donors policymakers development practitioners and academics on the efficacy of aid in eradicating poverty while promoting human development It seeks to fill the gap in present literature by presenting stories of better spending through implementing Sustainable Development Goals and addressing Agenda 2030 via indigenization of global development goals with initiatives at local and national levels The book adopts an innovative approach to dealing with aid effectiveness by highlighting the relevance of better spending rather than excessive spending It does so with real life examples of interventions made in the Global South to realize the vision of thinking globally and acting locally These case studies speak to the significance of communities role in shouldering responsibility for planning financing operating and maintaining local developmental initiatives The examples also demonstrate how aid serves its purpose when used as an investment in communities and enterprising individuals in order to realize the strategic impact of giving and build a local receiving mechanism for indigenizing and achieving global development goals The book references

cases of better spending by governments philanthropists and civil society organizations CSOs from across Asia Africa and Latin America on a range of issues and will thus be of interest to development practitioners policymakers donors philanthropists civil society organizations and academics and students of international development studies

**Master Plans and Encroachments** Faiza Moatasim, 2023-10-17 Among urban designers and municipal officials the term encroachment is defined as a deviation from the official master plan But in cities today such informal modifications to the urban fabric are deeply enmeshed with formal planning procedures Master Plans and Encroachments examines informality in the high modernist city of Islamabad as a strategic conformity to official schemes and regulations rather than as a deviation from them For the new administrative capital of Pakistan designed in 1959 by Greek architect and planner Constantinos A Doxiadis Islamabad's master plan offers a clear template of formal urban design within which informal spaces and processes have been articulated Drawing on deep archival research wide ranging interviews and an array of visual material including photographs maps and architectural drawings Faiza Moatasim shows how Islamabad's master plan is not simply a blueprint that guides future urban development or makes its violations apparent it is used by both city officials and citizens to develop informal spaces that accommodate unfulfilled needs and desires of those living and working in the city Master Plans and Encroachments is the first book that examines the informal practices of both the privileged and the underprivileged The book highlights how low middle and upper income people do not randomly build informal spaces they strategically use architectural techniques to support their informal claims to space which are often met with the government's tacit approval By focusing on those spaces in Islamabad's urban fabric that are not part of its official master plan the book demonstrates how planning actually works in complex ways

*Integrated Community-Managed Development* L. Jan Slikkerveer, George Baourakis, Kurniawan Saefullah, 2019-01-24 This book provides an overview of recent advances in Integrated Community Managed Development ICMD as an innovative strategy for the community based development of local institutions in order to achieve lasting poverty reduction and empowerment The original approach presented here to improving the lives and livelihoods of the poor takes a critical stance on the failing concept of conventional community development as it is based on the shifting paradigm of bottom up cooperation and development where recent regional autonomy policies are enabling national services to successfully integrate with local institutions at the community level Based on recent experiences in South East Asia where the implementation of an alternative approach to integrating financial medical educational communication and socio cultural services has led to increased community participation and impressive poverty reduction the book highlights the theoretical methodological and practical aspects of this innovative strategy The potential offered by applying the newly developed ICMD formula worldwide as a function of themes principles and services is reflected in the book's diverse range of contributions written by respected researchers and practitioners in the fields of development economics and financial management
