The Principles of Quantum Theory, From Planck's Quanta to the Higgs Boson Arkady Plotnitsky, 2016-09-26 The book considers foundational thinking in quantum theory focusing on the role the fundamental principles and principle thinking there including thinking that leads to the invention of new principles which is the book contends one of the ultimate achievements of theoretical thinking in physics and beyond The focus on principles prominent during the rise and in the immediate aftermath of quantum theory has been uncommon in more recent discussions and debates concerning it The book argues however that exploring the fundamental principles and principle thinking is exceptionally helpful in addressing the key issues at stake in quantum foundations and the seemingly interminable debates concerning them Principle thinking led to major breakthroughs throughout the history of quantum theory beginning with the old quantum theory and quantum mechanics the first definitive quantum theory which it remains within its proper

nonrelativistic scope It has the book also argues been equally important in quantum field theory which has been the frontier of quantum theory for quite a while now and more recently in quantum information theory where principle thinking was given new prominence The approach allows the book to develop a new understanding of both the history and philosophy of quantum theory from Planck's quantum to the Higgs boson and beyond and of the thinking the key founding figures such as Einstein Bohr Heisenberg Schrödinger and Dirac as well as some among more recent theorists The book also extensively considers the nature of quantum probability and contains a new interpretation of quantum mechanics the statistical Copenhagen interpretation Overall the book's argument is guided by what Heisenberg called the spirit of Copenhagen which is defined by three great divorces from the preceding foundational thinking in physics reality from realism probability from causality and locality from relativity and defined the fundamental principles of quantum theory accordingly

Autobiography as Activism Margo V. Perkins, 2009-10-05 Angela Davis Assata Shakur aka JoAnne Chesimard and Elaine Brown are the only women activists of the Black Power movement who have published book length autobiographies In bearing witness to that era these militant newsmakers wrote in part to educate and to mobilize their anticipated readers In this way Davis's Angela Davis An Autobiography 1974 Shakur's Assata 1987 and Brown's A Taste of Power A Black Woman's Story 1992 can all be read as extensions of the writers political activism during the 1960s Margo V Perkins's critical analysis of their books is less a history of the movement or of women's involvement in it than an exploration of the politics of storytelling for activists who choose to write their lives Perkins examines how activists use autobiography to connect their lives to those of other activists across historical periods to emphasize the link between the personal and the political and to construct an alternative history that challenges dominant or conventional ways of knowing The histories constructed by these three women call attention to the experiences of women in revolutionary struggle particularly to the ways their experiences have differed from men's The women's stories are told from different perspectives and provide different insights into a movement that has been much studied from the masculine perspective At times they fill in complement challenge or converse with the stories told by their male counterparts and in doing so hint at how the present and future can be made less catastrophic because of women's involvement The multiple complexities of the Black Power movement become evident in reading these women's narratives

against each other as well as against the sometimes strikingly different accounts of their male counterparts As Davis Shakur and Brown recount events in their lives they dispute mainstream assumptions about race class and gender and reveal how the Black Power struggle profoundly shaped their respective identities Dr. Alexander Hamilton and Provincial America Elaine G. Breslaw,2008-01-01 In this sweeping biography Elaine G Breslaw examines the life of Dr Alexander Hamilton 1712 1756 a highly educated Scottish physician who immigrated to Maryland in 1738 From an elite European family Hamilton was immediately confronted with the relatively primitive social milieu of the New World He faced unfamiliar and challenging social institutions the labor system that relied on black slaves extraordinarily fluid social statuses distasteful business methods unpleasant conversational quirks as well as variant habits of dress food and drink that required accommodation and when possible acceptance Paradoxically the more acclimated he became to Maryland ways the greater his impulse to change that society and make it more satisfying for himself both emotionally and intellectually Breslaw perceptively describes the ways in which Hamilton tried to transform the society around him attempting to re create the world he had left behind and thereby justify his continued residence in such an unsophisticated place Hamilton best known as the author of the *Itinerarium* a shrewd and insightful account of his journey through the colonies in 1744 also founded the Tuesday Club of Annapolis promoted a local musical culture and in his letters and essays provided witty commentary on the American social experience In addition to practicing medicine Hamilton participated in local affairs transporting to Maryland some of the rationalist ideas about politics religion and learning that were germinating in Scotland s early Enlightenment As Breslaw explains Hamilton s writings tell us that those adopted ideas were given substance and vitality in the New World long before the revolutionary crises Throughout her narrative Breslaw usefully sets Hamilton s life in both Scotland and America against the background of the major political military religious social and economic events of his time The largely forgotten story of a fascinating cosmopolitan and complex Scotsman Dr Alexander Hamilton and Provincial America illuminates our understanding of elites as they navigated their eighteenth century world *Catalog of Educational Captioned Films/videos for the Deaf* ,1993 Catalog of Captioned Educational Videos and Films ,1993 *Problems of Communism* ,1960
