History of Egypt, Chald³/₄a, Syria, Babylonia, and Assyria (Complete) Gaston Maspero, Professor Maspero does not need to be introduced to us His name is well known in England and America as that of one of the chief masters of Egyptian science as well as of ancient Oriental history and archaeology Alike as a philologist a historian and an archaeologist he occupies a foremost place in the annals of modern knowledge and research He possesses that quick apprehension and fertility of resource without which the decipherment of ancient texts is impossible and he also possesses a sympathy with the past and a power of realizing it which are indispensable if we would picture it aright His intimate acquaintance with Egypt and its literature and the opportunities of discovery afforded him by his position for several years as director of the Bulaq Museum give him an unique claim to speak with authority on the history of the valley of the Nile In the present work he has been prodigal of his abundant stores of learning and knowledge and it may therefore be regarded as the most complete account of ancient Egypt that has ever yet been published In the case of Babylonia and Assyria he no longer it is true speaks at first hand But he has thoroughly studied the latest and best authorities on the subject and has weighed their statements with the judgment which comes from an exhaustive acquaintance with a similar department of knowledge Naturally in progressive studies like those of Egyptology and Assyriology a good many theories and conclusions must be tentative and provisional only Discovery crowds so quickly on discovery that the truth of to day is often apt to be modified or amplified by the truth of to morrow A single fresh fact may throw a wholly new and unexpected light upon the results we have already gained and cause them to assume a somewhat changed aspect But this is what must happen in all sciences in which there is a healthy growth and archaeological science is no exception to the rule The spelling of ancient Egyptian proper names adopted by Professor Maspero will perhaps seem strange to many But it must be remembered that all our attempts to represent the pronunciation

of ancient Egyptian words can be approximate only we can never ascertain with certainty how they were actually sounded All that can be done is to determine what pronunciation was assigned to them in the Greek period and to work backwards from this so far as it is possible to more remote ages This is what Professor Maspero has done and it must be no slight satisfaction to him to find that on the whole his system of transliteration is confirmed by the cuneiform tablets of Tel el Amarna The difficulties attaching to the spelling of Assyrian names are different from those which beset our attempts to reproduce even approximately the names of ancient Egypt The cuneiform system of writing was syllabic each character denoting a syllable so that we know what were the vowels in a proper name as well as the consonants Moreover the pronunciation of the consonants resembled that of the Hebrew consonants the transliteration of which has long since become conventional When therefore an Assyrian or Babylonian name is written phonetically its correct transliteration is not often a matter of question But unfortunately the names are not always written phonetically The cuneiform script was an inheritance from the non-Semitic predecessors of the Semites in Babylonia and in this script the characters represented words as well as sounds Not unfrequently the Semitic Assyrians continued to write a name in the old Sumerian way instead of spelling it phonetically the result being that we do not know how it was pronounced in their own language The name of the Chaldean Noab for instance is written with two characters which ideographically signify the sun or day of life and of the first of which the Sumerian values were ut babar khis tarn and par while the second had the value of zi Were it not that the Chaldean historian Berosus writes the name Xisuthros we should have no clue to its Semitic pronunciation *Paradoxes in God's Garden* Ori Z.

powerful goddess queens of ancient Egypt One of history's most iconic figures Cleopatra is rightly remembered as a clever and charismatic ruler But few today realize that she was the last in a long line of Egyptian queens who bore that name In *The Cleopatras* historian Lloyd Llewellyn Jones tells the dramatic story of these seven incomparable women vividly recapturing the lost world of Hellenistic Egypt and tracing the kingdom's final centuries before its fall to Rome The Cleopatras were

Greek speaking descendants of Ptolemy the general who conquered Egypt alongside Alexander the Great They were closely related as mothers daughters sisters half sisters and nieces Each wielded absolute power easily overshadowing their husbands or sons and all proved to be shrewd and capable leaders Styling themselves as goddess queens the Cleopatras ruled through the canny deployment of arcane rituals opulent spectacles and unparalleled wealth They navigated political turmoil and court intrigues led armies into battle and commanded fleets of ships and ruthlessly dispatched their dynastic rivals The Cleopatras is a fascinating and richly textured biography of seven extraordinary women restoring these queens to their deserved place among history s greatest rulers
