 Introduction The moment you hear the word orchid you have an immediate vision of an exotic exquisite flower being
 presented to a dainty young maiden getting ready for her first prom This particular word has become synonymous with grace
 class and luxury And they are not as rare as they are supposed to be even if they come in the expensive desirable item
 category There are 20 000 species of orchids growing all over the world Most of them have not been classified at all and
 many species are still being discovered in remote corners of the earth and their classification being debated by botanists all
 over the world today Ever since orchids became a rage in the 19th century with horticulturists growing them in hothouses
 and experimenting with them more than hundred thousand cultivars and hybrids have sprung up from the original 20 000
 varieties and species So that is how Vanda Cattleya Dendrobium and other popular orchid specimens came into the public
 eye and social usage Apart from the colorful and fragrant flowers the leaves of many varieties are also considered to be
 ornamental These leaves are perennial and they are going to live for a number of years On the other hand there are other
 varieties which are going to develop new leafy outgrowths after shedding the old leaves every year The ornamental leaves of
 Macodes sanderiana which is a species which can be found clinging to rocks instead of growing on the branches of trees has
 thin veins of gold and silver on the green leafy background This is quite an unusual natural phenomena and other orchid
 varieties also have mottled leaves due to the uneven distribution of pigmentation and chlorophyll **Orchid Biology** J.
 Arditti, Alec M. Pridgeon, 2013-04-17 A Personal Note I decided to initiate Orchid Biology Reviews and Perspectives in about
 1972 and alone or with co authors started to write some of the chapters and the appendix for the volume in 1974 during a
 visit to the Bogor Botanical Gardens in Indonesia Professor H C D de Wit of Holland was also in Bogor at that time and when
 we discovered a joint interest in Rumphius he agreed to write a chapter about him I visited Bangkok on my way home from
 Bogor and while there spent time with Professor Thavorn Vajrabhaya He readily agreed to write a chapter The rest of the
 chapters were solicited by mail and I had the complete manuscript on my desk in 1975 With that in hand I started to look for
 a publisher Most of the publishers I contacted were not interested Fortunately Mr James Twigg at that time editor of Cornell
 University Press grew orchids and liked the idea He decided to publish Orchid Biology Reviews and Perspectives and volume
 I saw the light of day in 1977 I did not know if there would be a volume II but collected manuscripts for it anyway Fortunately
 volume I did well enough to justify a second book and the series was born It is still alive at present 20 years seven volumes
 and three publishers later I was in the first third of my career when volume I was published **Your First Orchids and
