Word Order and Information Structure in Makhuwa-Enahara Jenneke Van der Wal, 2009 This thesis investigates the grammar of Makhuwa Enahara a Bantu language spoken in the north of Mozambique The information structure is an influential factor in this language determining the word order and the use of special conjugations known as conjoint and disjoint verb forms The thesis consists of two parts The first part is a grammatical description of the language covering the basic properties in the phonology prosody and morphology of the nominal and verbal domain as well as an overview of the conjugational system The chapter also examines some syntactic issues such as relativisation and non verbal predication The second part is concerned with the question how syntax and information structure interact in Makhuwa Enahara The elements in a sentence are positioned before or after the verb on the basis of their information structure Elements in the preverbal domain are interpreted as more accessible functioning as topics The disjoint verb and elements in the postverbal domain form the comment The element immediately following the conjoint verb form is interpreted not just as new information but as exclusive meaning that the proposition holds for that referent and not for some other referents These data can be accounted for if insights from syntax and information structure are combined Two such approaches are discussed a cartographic model and an interface model Two interface rules are proposed to account for the interpretation of word order and the conjoint and disjoint verb forms in Makhuwa Enahara

historical linguistics      Order, Concord, and Constituency Gerald Gazdar, Ewan Klein, Geoffrey K. Pullum, 2019-11-18 No detailed description available for Order Concord and Constituency      *Scrambling and Barriers* Günther Grewendorf, Wolfgang Sternefeld, 1990-01-01 The articles in this volume deal with various phenomena which have been covered traditionally by the term scrambling The analyses presented here refer to the most recent developments in generative grammar the so called Barriers framework developed in Chomsky 1986 Some of the topics discussed are the movement vs the base structure approach to scrambling the correlation between the possibility of scrambling and certain infinitive structures scrambling and ergativity barriers and domains for scrambling      The expression of information structure in Bantu Jenneke van der Wal, 2025-03-18 The Bantu language family is spread over a large area of Africa stretching from Cameroon to Kenya to South Africa and comprises an estimated 555 languages The languages show a large amount of small scale variation while at the same time forming part of one relatively uniform family within Niger Congo Interestingly the morphosyntax of these languages has been observed to be heavily influenced by information structure Studying the expression of information structure in Bantu is therefore of great importance not only for developing cognitive models of the role of information structure in language but also for understanding the basic grammatical structure of the Bantu languages themselves Before modelling the interaction between syntax and information structure in Bantu however a thorough empirical description of the expression of information structure in Bantu should be available That description is what this book aims to provide This book follows from a systematic investigation of information structure in the languages of the BaSIS research project Bantu Syntax and Information Structure The data come from original field research conducted using the BaSIS methodology which was specifically developed to investigate the expression of information structure in Bantu The book contains a comprehensive introduction chapter which explains the main terms and issues in the field of information structure the methodology employed in the project and common structures which characterise topic and focus expression in Bantu The introduction is then followed by eight chapters which each give detailed descriptive overviews of the expression of information structure in a different Bantu language namely Tunen Guthrie classification A44 Cameroon Teke Kukuya B77 Congo K tharaka E54 Kenya Kirundi JD62 Burundi Rukiga JE14 Uganda Kinyakyusa M31 Tanzania Makhwa Enahara P31 Mozambique and Cicopi S61 Mozambique Taken together the book provides detailed information on the expression of information structure in the Bantu family It is intended both to inform future theoretical work and to provide a methodology and model for the investigation of information structure that can be used in studies of other languages
