Order Microsauria:

The Order Microsauria Robert Lynn Carroll, Pamela Gaskill, 1978 This volume discusses in particular the suggested relationship of microsaurians with reptiles and the determination of the ancestry of the various groups of living amphibians. Twenty five general of microsaurians are recognized in this work. Contents: History of the Microsaur Concept, Definition of Microsaurians, Methods of Study, Taxonomy, Systematic Description, Comparative Anatomy, Relationships of Microsaurians, Geological and Geographical Distribution and Biology of Microsaurians, Summary and References, Cited Illustrations. **The Coal Measures Amphibia of North America** Roy Lee Moodie, 1916 *Studies from the Dept. of Anatomy, University of Illinois College of Medicine, Chicago* University of Illinois (Urbana-Champaign campus). College of Medicine. Department of Anatomy, 1916 *The Order Microsauria*, 1978 Carnegie Institution of Washington Publication, 1907 **Nekton** Yu.G. Aleyev, 2012-12-06 1. Nekton as an ecomorphological type of biont. The term nekton was suggested and used for the first time in 1890 by E. Haeckel in his book *Plankton Studien*. Etymologically the word nekton derives from the Greek νεκτον (nektōn) i.e. swimming. As Haeckel defined it, nekton describes collectively all swimming animals that are free to choose their path i.e. can resist a strong current of water and distinct from planktonic animals go where they wish. While giving a general idea of the dividing line between plankton and nekton, Haeckel's definition which has played an important role in shaping our ideas about nekton today no longer provides a sufficient basis for ecological and functional morphological investigations since it affords no possibility of quantitatively assessing either the boundary between plankton and nekton or that between nekton and other ecomorphological types of biont. Thus Parin (1968) proceeding from Haeckel's principle believes that in the epipelagic zone of the ocean the minimum size of nektonic fishes with a well developed capacity for active swimming may be between 15 and 30 cm as fishes shorter than 15 cm are unable to counter oceanic currents. Meanwhile young *Leucaspis* *Leucaspis delineatus* only 1.5 cm long observed by this writer in ponds near Moscow proved capable of active horizontal migrations across the entire body of water which if Haeckel's definition is accepted brings the border between planktonic and nektonic fish in this case to between 1.5 and 2.0 cm. **Studies ...** University of Illinois Chicago Professional Colleges. College of Medicine. Dept. of Anatomy, 1916 The Age of Reptiles Edwin H. Colbert, 2012-09-19 Concise detailed review amply illustrated of the astonishing creatures that ruled the earth for some 180 million years with particular emphasis on the tetrapods four legged vertebrates that lived during the years of reptilian dominance. Also examines interrelationships between amphibians and reptiles, birds and mammals and between these creatures and their environments. Vertebral Morphology, Alternation of Neural Spine Height, and Structure in Permo-Carboniferous Tetrapods, and a Reappraisal of Primitive Modes of Terrestrial Locomotion Stuart Shigeo Sumida, 1990-09-18 In this volume the author examines the pervasive pattern of alternation of structure and height of vertebral neural spines in the context of a larger review of axial structure in the most terrestrial of primitive Permo-Carboniferous tetrapods. He concludes that a coupled pattern of axial

dorsiflexion and rotation played a significant role in primitive terrestrial locomotion *Encyclopedia of Paleontology* Ronald Singer, 2019-06-04 The Encyclopedia of Paleontology is designed to address the shortage of general reference works on both vertebrate and invertebrate paleontology and to serve the needs of students and lay persons interested in the field As the encyclopedia aims to provide basic information the majority of the 350 entries are devoted to explanations of paleontological concepts and techniques examinations of the evolutionary development of particular organisms and biological features profiles of major discoveries and biographies of leading scientists Each entry includes an essay and a further reading list An international team of 200 leading experts in the field has prepared the illustrations and the essays which range from concise descriptions to comprehensive discussions **Mémoires Et Comptes Rendus de la Société Royale Du Canada** Royal Society of Canada, 1905 The American Journal of Science , 1929 A Concise Dictionary of Paleontology Robert L.
