Ordered Algebraic Structures:

Ordered Algebraic Structures Jorge Martínez, 2013-03-14 From the 28th of February through the 3rd of March 2001 the Department of Mathematics of the University of Florida hosted a conference on the many aspects of the field of Ordered Algebraic Structures Officially the title was Conference on Lattice Ordered Groups and ℓ Rings but its subject matter evolved beyond the limitations one might associate with such a label This volume is officially the proceedings of that conference although likewise it is more accurate to view it as a complement to that event The conference was the fourth in what has turned into a series of similar conferences on Ordered Algebraic Structures held in consecutive years The first held at the University of Florida in Spring 1998 was a modest and informal affair The fifth is in the final planning stages at this writing for March 7-9 2002 at Vanderbilt University And although these events remain modest and reasonably informal their scope has broadened as they have succeeded in attracting mathematicians from other related fields as well as from more distant lands

Lattices and Ordered Algebraic Structures T.S. Blyth, 2005-11-24 The notion of an order plays an important role not only throughout mathematics but also in adjacent disciplines such as logic and computer science The purpose of the present text is to provide a basic introduction to the theory of ordered structures Taken as a whole the material is mainly designed for a postgraduate course However since prerequisites are minimal selected parts of it may easily be considered suitable to broaden the horizon of the advanced undergraduate Indeed this has been the author's practice over many years A basic tool in analysis is the notion of a continuous function namely a mapping which has the property that the inverse image of an open set is an open set In the theory of ordered sets there is the corresponding concept of a residuated mapping this being a mapping which has the property that the inverse image of a principal down set is a principal down set It comes therefore as no surprise that residuated mappings are important as far as ordered structures are concerned Indeed albeit beyond the scope of the present position the naturality of residuated mappings can perhaps best be exhibited using categorical concepts If we regard an ordered set as a small category then an order preserving mapping $f: A \rightarrow B$ becomes a functor Then f is residuated if and only if there exists a functor $g: B \rightarrow A$ such that f, g is an adjoint pair

Ordered Algebraic Structures Jorge Martinez, Fra, 2014-01-15 This volume contains a selection of papers presented at the 1991 Conrad Conference held in Gainesville Florida USA in December 1991 Together these give an overview of some recent advances in the area of ordered algebraic structures The first part of the book is devoted to ordered permutation groups and universal as well as model theoretic aspects The second part deals with material variously connected to general topology and functional analysis Collectively the contents of the book demonstrate the wide applicability of order theoretic methods and how ordered algebraic structures have connections with many research disciplines For researchers

and graduate students whose work involves ordered algebraic structures Ordered Algebraic Structures W. B. Powell, 1985-10-01 The papers contained in this volume constitute the proceedings of the Special Session on Ordered Algebraic Structures which was held at the 1982 annual meeting of the American Mathematical Society in Cincinnati Ohio The Special Session and this volume honor Paul Conrad whose work on the subject is noted for its depth and originality These papers address many areas within the subject of ordered algebraic structures including varieties free algebras lattice ordered groups subgroups of ordered groups semigroups ordered rings and topological properties of these structures

Ordered Algebraic Structures W.C. Holland, Jorge Martínez, 1997-03-31 The conference on Ordered Algebraic Structures held in Curaçao from the 26th of June through the 30th of June 1995 at the Avila Beach Hotel marked the eighth year of activities by the Caribbean Mathematics Foundation abbr CMF which was the principal sponsor of this conference CMF was inaugurated in 1988 with a conference on Ordered Algebraic Structures During the years between these two conferences the field has changed sufficiently both from my point of view and I believe that of my co organizer W Charles Holland to make one wonder about the label Ordered Algebraic Structures itself We recognized this from the start and right away this conference carried a subtitle or if one prefers an agenda we concentrated on the one hand on traditional themes in the theory of ordered groups including model theoretic aspects and on the other hand on matters in which topology more precisely C X style topology and category theory would play a prominent role Plainly ordered algebra has many faces and it is becoming increasingly difficult to organize an intimate conference such as the ones encouraged in the series sponsored by CMF in this area on a broad set of themes These proceedings reflect accurately we think the spirit of the conferees but it is not a faithful record of the papers presented at the conference Ordered Algebraic Structures W.C.
