Organ Transplants A Survival Guide For The Entire Family:

Organ Transplants Tina P. Schwartz, 2005 This is a one of a kind book that addresses the issue of what it's like to be involved with an organ transplant procedure. It's filled with real life stories of teens whose parents, siblings or other family members are transplant recipients as well as teens who have had transplants themselves and includes stories of recipients who have received heart, liver, kidney, pancreas and double lung transplants. This book describes the physical and emotional ups and downs that are part of the transplant process. It addresses from both the recipient's and family's point of view what it feels like to be placed on the transplant list to wait for an organ, to receive false alarm calls to come to the transplant center to finally undergo the transplant operation to recover, to deal with setbacks of surgery and organ rejection and to live on anti rejection drugs the rest of one's life. Also detailed are the medical, financial, mental and other preparations that must be undertaken as part of the transplant process. Guidance on what to expect, how to help, where to seek assistance and how to support the patient is also given. Answers to the tough practical and emotional questions that teens have about an organ transplant such as will my parent survive the surgery, how long will it take for my parent to recover and why is this happening to me are discussed. Numerous question and answer sections of frequently asked questions about organ transplants and the myths that surround them are included as well as contact information for organizations that provide many forms of assistance for recipients and their families. Through all the serious issues, however, this book offers much hope and promise for recipients and their families through the stories of those whose lives have been greatly improved through an organ transplant. This is the ideal resource for all readers who are interested in the subject of organ donation and transplant including those who are facing a transplant and their family members as well as *Organ Transplants* Tina P.
