P. Agrawal, Pushpa Rani Sharma, 1992 *Organizing Knowledge* Jennifer Rowley, Richard Hartley, 2017-05-15 The fourth edition of this standard student text *Organizing Knowledge* incorporates extensive revisions reflecting the increasing shift towards a networked and digital information environment and its impact on documents information knowledge users and managers Offering a broad based overview of the approaches and tools used in the structuring and dissemination of knowledge it is written in an accessible style and well illustrated with figures and examples The book has been structured into three parts and twelve chapters and has been thoroughly updated throughout Part I discusses the nature structuring and description of knowledge Part II with its five chapters lies at the core of the book focusing as it does on access to information Part III explores different types of knowledge organization systems and considers some of the management issues associated with such systems Each chapter includes learning objectives a chapter summary and a list of references for further reading This is a key introductory text for undergraduate and postgraduate students of information management **Subject Guide to Communication, Informatics and Librarianship in India** S. P. Agrawal, Pushpa Rani Sharma, 1994 *The Subject Approach to Information* Antony Charles Foskett, 1996 The Internet and World Wide Web have made access to information easy but do not solve the problems of finding exactly what is wanted to the

point of overwhelming the reader with information Since the first edition of this classic librarianship text appeared the development of computer technology has meant that the organization of information has become a hugely complex area This fifth edition places emphasis on the intellectual effort required to make meaningful use of the enormous amount of information now accessible to the searcher Fully revised and updated in comprehensive detail that includes bibliographies ample examples and quotations it focuses on information retrieval systems database access systems online searching and OPACs hypertext networked systems Foskett describes how we search for information by looking at the problems involved at the theoretical principles suggested as solutions and their practical realization as classification schemes lists of subject headings and thesauri Readership This influential text is widely acknowledged to be essential reading for all students of librarianship and information management and an invaluable reference tool for practising library and information professionals

Education for Cataloging and the Organization of Information Janet Swan Hill, 2014-04-23 What does the future hold for cataloging education Written by some of the best known authors and most innovative thinkers in the field including Michael Gorman Sheila S Intner and Jerry D Saye this comprehensive collection examines education for students and working librarians in cataloging and bibliographic control emphasizing history context the state of the art at present and suggested future directions A liberal dose of visual aids charts tables etc makes accessing the information quick and easy From the editor The education of catalogers has swung pendulum like from on the job training to graduate education and back again The place of cataloging in the library school curriculum has swung from one of near pre eminence to one of near extinction and has begun to swing back again The durability of education for cataloging has swung from In getting your degree you will learn everything you need to know in your career to You will have to engage in continuing education throughout your career beginning virtually as soon as you have your degree Making informed decisions about how and how much cataloging education is to be provided is full of pitfalls some of which the profession has fallen into already What is needed now is a reconsideration of how education for cataloging and bibliographic control is provided *Education for Cataloging and the Organization of Information* Pitfalls and the Pendulum addresses four main areas the ways professionals perceive the place nature and necessity of cataloging education the professional demographic and academic context within which cataloging education is provided education regarding special types of materials and special aspects of cataloging and alternatives to traditional modes of education for cataloging including distance education online mentoring Web based instruction continuing education training for and via cooperative projects the role of the community of catalogers in the continuing education of those who provide intellectual access to the world of information and much more

Classification in Theory and Practice Susan Batley, 2014-09-11 Following on from the first edition of this book the second edition fills the gap between more complex theoretical texts and those books with a purely practical approach The book looks at major library classification schemes in use in Europe UK and the USA and includes practical exercises to demonstrate their

application Importantly classifying electronic resources is also discussed Classification in Theory and Practice aims to demystify a very complex subject and to provide a sound theoretical underpinning together with practical advice and development of practical skills Chapters concentrate purely on classification rather than cataloguing and indexing ensuring a more in depth coverage of the topic Covers the latest Dewey Decimal Classification 23rd edition Provides practical advice on which schemes will be most suitable for different types of library collection Covers classification of digital resources Explores recent developments in digital resources and tagging

Introduction to Cataloging and Classification Daniel N. Joudrey, Arlene G. Taylor, David P. Miller, 2015-09-29 A new edition of this best selling textbook reintroduces the topic of library cataloging from a fresh modern perspective Not many books merit an eleventh edition but this popular text does Newly updated Introduction to Cataloging and Classification provides an introduction to descriptive cataloging based on contemporary standards explaining the basic tenets to readers without previous experience as well as to those who merely want a better understanding of the process as it exists today The text opens with the foundations of cataloging then moves to specific details and subject matter such as Functional Requirements for Bibliographic Records FRBR Functional Requirements for Authority Data FRAD the International Cataloging Principles ICP and RDA Unlike other texts the book doesn't presume a close familiarity with the MARC bibliographic or authorities formats ALA's Anglo American Cataloging Rules 2nd Edition revised AACR2R or the International Standard Bibliographic Description ISBD Subject access to library materials is covered in sufficient depth to make the reader comfortable with the principles and practices of subject cataloging and classification In addition the book introduces MARC BIBFRAME and other approaches used to communicate and display bibliographic data Discussions of formatting presentation and administrative issues complete the book questions useful for review and study appear at the end of each chapter

Organising Knowledge Patrick Lambe, 2014-01-23 Taxonomies are often thought to play a niche role within content oriented knowledge management projects They are thought to be nice to have but not essential In this ground breaking book Patrick Lambe shows how they play an integral role in helping organizations coordinate and communicate effectively Through a series of case studies he demonstrates the range of ways in which taxonomies can help organizations to leverage and articulate their knowledge A step by step guide in the book to running a taxonomy project is full of practical advice for knowledge managers and business owners alike Written in a clear accessible style demystifying the jargon surrounding taxonomies Case studies give real world examples of taxonomies in use Step by step guides take the reader through the key stages in a taxonomy project

Hider, 2012-11-23 An overview of the field of information organization that examines resource description as both a product and process of the contemporary digital environment This timely book employs the unifying mechanism of the semantic web

and the resource description framework to integrate the various traditions and practices of information and knowledge organization. Uniquely it covers both the domain specific traditions and practices and the practices of the metadata movement through a single lens that of resource description in the broadest semantic web sense. This approach more readily accommodates coverage of the new Resource Description and Access RDA standard which aims to move library cataloguing into the centre of the semantic web. The work surrounding RDA looks set to revolutionise the field of information organization and this book will bring both the standard and its model and concepts into focus. Key topics include information resource attributes, metadata for information retrieval, metadata sources and quality, economics and management of metadata, knowledge organization systems, the semantic web, books and e books, websites and audiovisual resources, business and government documents, learning resources, the field of information knowledge organization. Readership: LIS students taking information organization courses at undergraduate and postgraduate levels; information professionals wishing to specialise in the metadata area; and existing metadata specialists who wish to update their knowledge.

Knowledge Management and Drivers of Innovation in Services Industries Ordóñez de Pablos, Patricia, Lytras, Miltiadis D., 2012-04-30. Knowledge Management is concerned with all aspects of eliciting, acquiring, modelling and managing knowledge. Application of knowledge resources successfully helps the organization to deliver creative products and services. Especially in service business, service job experience and information about the customer as well as the installed site equipment are key factors to deliver services efficiently and with high quality. In many cases, supporting information is stored in different backend systems and it needs to be retrieved, aggregated and presented on demand. Knowledge Management and Drivers of Innovation in Services Industries provides a comprehensive collection of knowledge from experts within the Information and Knowledge Management field. Outlining areas on Knowledge Management, Innovation, Information Technologies and Systems and Services Industry, this book provides insight for academic professors, policymakers and students alike.
