a collection of Edward Chace Tolman's seminal papers tracing the evolution of his systematic theory of purposive behaviorism. Compiled by former students and colleagues, this anthology not only honors Tolman's contributions during his tenure at the University of California but also serves as a valuable psychological document. The essays illustrate the trajectory of Tolman's thinking from its nascent stages to a mature, albeit continually evolving, framework that integrates experimental findings with theoretical innovation. Tolman's work is characterized by its breadth and inclusivity, embracing all aspects of psychological inquiry. His insistence on exploring behavior as multidetermined led to the development of a system that encompassed learning, motivation, perception, and personality. A pioneer in the use of hypothetical constructs and intervening variables, Tolman advanced a centralist approach to psychology, bridging behaviorism, Gestalt theory, and depth psychology. His emphasis on molar behavior and cognitive maps reintroduced complexity and purposiveness to psychological theory, transforming how learning, problem solving, and human behavior are understood. This collection, which combines rigorous science with Tolman's characteristic wit and creativity, not only captures the essence of his theories but also reflects the humanistic and collaborative spirit that defined his teaching and scientific legacy.
