Random House Parent And Child Trivia:

Parents, Children, and the Facts of Life Henry V. Sattler, 1993-06 Father Sattler has written *Parents Children and the Facts of Life* to help parents fulfill the extremely important duty of training boys and girls to be pure and innocent and eventually to enter marriage with a noble and holy purpose if God calls them to that state of life According to the official Catholic teaching sex education is the duty of the parents yet many parents still struggle to convey the facts of life to their children in a natural and inspiring way Applying traditional Catholic principles to very practical questions Fr Sattler explains what parents should tell their children when and how they should tell it what moral and psychological dangers they must avoid and what questions they should anticipate His conversational and down to earth style provides parents with the confidence and practical wisdom to fulfill their role as their children s primary teachers of the facts of life The Mindful Parent Charlotte Peterson, 2015-11-17 Over the last four decades American hospitals have seen a steady increase in children suffering from psychological disorders peer violence and suicide attempts To figure out why this is happening and how to put an end to it child psychologist Dr Charlotte Peterson has been spending six months every five years living in indigenous villages and observing their parenting practices What she s found is that the people of peaceful cultures particularly the Tibetan Bhutanese and Balinese people know something we Westerners despite our modernity don t and their children are happier healthier and more balanced because of it What Dr Peterson has found is that the children in these cultures are raised with a high degree of cherishing and empathy Attachments are promoted by intensive nurturing of infants and gentle clear limit setting with toddlers that teaches self control and builds self esteem The result as Dr Peterson has found after visiting these places again and again is children who are trusting enjoyable and kind not spoiled as we might imagine The Mindful Parent brings together Dr Peterson s village interviews observations research and over thirty five years of work as a psychologist to teach modern parents how to raise healthier more well balanced and kinder children It includes creative ideas from parents who are currently adopting these practices and balancing other aspects of their personal career and financial responsibilities to assure their children get the support they need to thrive It Takes a Child to Raise a Parent Janis Clark Johnston, 2013-04-04 While advice abounds from a variety of sources before parents embark on their parenting journeys the only parent preparation we actually receive comes from our family and peer stories Yet most adults do not realize that in day to day challenges of guiding our children something interesting happens As we steer our children through life we reopen our own childhood roads Just when our child most needs us we become needy ourselves as adults and parents we find that we have unresolved raising issues basic needs that were not met in our childhoods Our needs and memories echo and influence many of the parenting decisions we make even though we re unaware of those influences at times Fortunately children help parents reach their needs as much as their parents help them fulfill their own Our child ends up guiding us by connecting us to some earlier time in our life when we encountered distress We dredge up a lesson and we

adapt by adhering to or changing the story that we tell ourselves about who we are We re negotiate the five basic needs that surface from our childhood memories as our youngsters pass through each of the developmental phases The self aware parent focuses on creative problem solving by focusing on one interaction at a time It Takes a Child to Raise a Parent offers an exploration of how our own childhood memories and needs influence and shape our parenting decisions in our adult lives Offering tips stories from a variety of families and step by step exercises Janis Johnston helps parents better understand and grasp the tools necessary to face parenting challenges head on and to explore new ways of understanding ourselves our children and our family interactions Expectant parents and current parents interested in understanding their own personality development as well as the many moods of childhood and their own children will find clear guidelines for understanding their roles in their children s lives as well as concrete suggestions for how to navigate the choppy waters of raising children *Do Men Mother?* Andrea Doucet, 2018-04-13 The first edition of *Do Men Mother* 2006 was awarded the John Porter Tradition of Excellence Book Award from the Canadian Sociological Association and remains one of the most widely cited books on primary caregiving fathers and stay at home fathers This second edition of *Do Men Mother* builds on interviews conducted between 2000 and 2004 with 101 fathers and 14 mother father couples and follow up interviews with six of the mother father couples about a decade later It charts how fathers and mothers navigate and negotiate parental and breadwinning responsibilities and calls attention to the generative changes that occur for men when they share responsibilities for their children s care Working closely with Sara Ruddick s *Maternal Thinking* 1989 Doucet advocates for a wider maternal lens that focuses on entanglements between dependence independence inter dependence and argues that fathers stories expand how we think about mothering and caregiving In this expanded second edition with a new Preface and two new chapters Doucet takes on three revisiting projects returning to interview several research participants re entering scholarly fields of work care and parenting in shifting neoliberal contexts and rethinking her approach to knowledge making concepts and narratives Bringing together what she calls diffractive readings of feminist philosopher Lorraine Code s ecological approach to knowledge making and historical sociologist Margaret Somers genealogical and relational approach to concepts and her non representational approach to narratives Doucet lays out an innovative ecological and non representational approach to knowledge making concepts and narratives about care work and paid work This book calls for greater attention not only to what we claim to know but also to how we come to know write about and intervene in shifting practices concepts and narratives of work and care the politics of care and growing crises of care *Becoming a mother* Carla Pascoe Leahy, 2023-04-04 *Becoming a mother* charts the diverse and complex history of Australian mothering for the first time exposing the ways it has been both connected to and distinct from parallel developments in other industrialised societies In many respects the historical context in which Australian women come to motherhood has changed dramatically since 1945 And yet examination of the memories of multiple maternal generations reveals surprising continuities in the emotions and

experiences of first time motherhood Drawing upon interdisciplinary insights from anthropology history psychology and sociology Carla Pascoe Leahy unpacks this multifaceted rite of passage through more than 60 oral history interviews demonstrating how maternal memories continue to influence motherhood today Despite radical shifts in understandings of gender care and subjectivity becoming a mother remains one of the most personally and culturally significant moments in a woman s life

Slick Spins and Fractured Facts Caryl Rivers,1996 French rule in Syria and Lebanon coincided with the rise of colonial resistance around the world and with profound social trauma after World War I In this tightly argued study Elizabeth Thompson shows how Syrians and Lebanese mobilized like other colonized peoples to claim the terms of citizenship enjoyed in the European metropole The negotiations between the French and citizens of the Mandate set the terms of politics for decades after Syria and Lebanon achieved independence in 1946 Colonial Citizens highlights gender as a central battlefield upon which the relative rights and obligations of states and citizens were established The participants in this struggle included not only elite nationalists and French rulers but also new mass movements of women workers youth and Islamic populists The author examines the gendered battles fought over France s paternalistic policies in health education labor and the press Two important and enduring political structures issued from these conflicts First a colonial welfare state emerged by World War II that recognized social rights of citizens to health education and labor protection Second tacit gender pacts were forged first by the French and then reaffirmed by the nationalist rulers of the independent states These gender pacts represented a compromise among male political rivals who agreed to exclude and marginalize female citizens in public life This study provides a major contribution to the social construction of gender in nationalist and postcolonial discourse Returning workers low ranking religious figures and most of all women to the narrative history of the region figures usually omitted Colonial Citizens enhances our understanding of the interwar period in the Middle East providing needed context for a better understanding of statebuilding nationalism Islam and gender since World War II

Facts, Values, and Norms Peter Railton, 2003-03-17 In our everyday lives we struggle with the notions of why we do what we do and the need to assign values to our actions Somehow it seems possible through experience and life to gain knowledge and understanding of such matters Yet once we start delving deeper into the concepts that underwrite these domains of thought and actions we face a philosophical disappointment In contrast to the world of facts values and morality seem insecure uncomfortably situated easily influenced by illusion or ideology How can we apply this same objectivity and accuracy to the spheres of value and morality In the essays included in this collection Peter Railton shows how a fairly sober naturalistically informed view of the world might nonetheless incorporate objective values and moral knowledge This book will be of interest to professionals and students working in philosophy and ethics
