Violence among the Mentally III Sheilagh Hodgins, 2012-12-06 The NATO Advanced Study Institute on the Prevention of Crime and Violence Among the Mentally III was held in May 1999 in Tuscany Italy Participants from 15 countries attended Since care for persons with mental illness schizophrenia major depression bipolar disorder delusional disorder atypical psychoses has been deinstitutionalized some persons with these disorders are committing crimes and serious violence Consequently societies around the world are confronted with a new challenge to provide mental health care and social services to mentally ill persons in a humane way that will prevent illegal behaviours Research in this field has been dominated by investigations designed to improve clinicians accuracy in predicting violent behaviours with little attention focused on the organization and implementation of treatments The premise of the Advanced Study Institute was that treatments must have empirically proven efficacy Both professional ethics and public accountability require empirical evidence that each treatment will alleviate the problem that it targets However despite the fact that Western industrial societies provide treatment for mentally ill persons who have offended there is a very limited base of knowledge on what constitutes effective treatment and how such treatments should be organized and delivered The Advanced Study Institute was an attempt to stimulate and encourage research that will extend this knowledge base The goals were to review what is known about mentally ill offenders and about effective treatments for them and to provide a framework for the orientation of future investigations designed to improve treatment efficacy

Computational Social Science (ICNCSS 2025) Roshan Chitrakar, Chew Fong Peng, Mata Liliana, Ameha Tefera

Tessema, 2025-09-24 This is open access book Welcome to The 5th International Conference on New Computational Social Science which will be held on July 11-13, 2025, Guilin, Guangxi, China. The focus of this conference are mainly five aspects: Big data acquisition and analysis; Integration of qualitative research and quantitative research; Sociological Internet experiment research; Application of ABM simulation method in Sociology Research; Research and development of new social computing tools. With the rapid development of information technology, especially sweeping progress in the Internet of things, cloud computing, social networks, social media, and big data, as a data-intensive science, social computing is an emerging thing that leverages the capacity to collect and analyze data with an unprecedented breadth, depth, and scale. It represents a new computing paradigm and an interdisciplinary research and application field. A broad comprehension of major topics involved in social computing is important for both scholars and practitioners. This is an international conference on various research aspects of Computational Social Science. We will present and discuss key concepts and analyze state of the art of the field. The conference not only sheds insights on social computing but also affords conduit for future research in the field. Social computing has two distinct trends. One is on the social science issues such as computational social science, computational sociology, social network analysis, etc. The other is on the use of computational techniques such as social use, hedonic use, and generative use. Finally, some new challenges ahead are summarized, including interdisciplinary cooperation and training, big data sharing for scientific data mashups, and privacy protect.
