Hawks from Every Angle takes hawk identification to new heights. It offers a fresh approach that literally looks at the birds from every angle, compares and contrasts deceptively similar species, and provides the pictures and words needed for identification in the field. Jerry Liguori pinpoints innovative, field-tested identification traits for each species from the various angles that they are seen. Featuring 339 striking color photos on 68 color plates and 32 black and white photos, *Hawks from Every Angle* is unique in presenting a host of meticulously crafted pictures for each of the 19 species it covers in detail: the species most common to migration sites throughout the United States and Canada. All aspects of raptor identification are discussed, including plumage, shape, and flight style traits. For all birders who follow hawk migration and have found themselves wondering if the raptor in the sky matches the one in the guide, *Hawks from Every Angle* distilling an expert's years of experience for the first time into a comprehensive array of truly useful photos and other pointers for each species is quite simply a must.

The Raptors of Arizona Richard L. Glinski, 2021-11-16. Thousands of birdwatchers come to Arizona each year seeking rare or intriguing species, and for those watching the skies, the additional sighting of a bird of prey is a reward in itself. The Grand Canyon state boasts the most dramatic assortment of raptors in North America: hawks, eagles, falcons, kites, and owls, plus vultures and condors. Here can be found nearly all the raptor species of the continental United States and also established populations of species associated with Mexico, such as the Gray Hawk, Common Black Hawk, Zone-tailed Hawk, and Whiskered Screech Owl.

Arizona's raptors are found in an unrivaled diversity of habitats from saguaro cactus forests where tiny Elf Owls nest to the Vermilion Cliffs where the gigantic California Condor was introduced in 1996. Yet many species live in habitats that are now jeopardized by degradation or development making an understanding and appreciation of raptors crucial to their survival. *The Raptors of Arizona* brings together the knowledge and insights of 29 raptor and wildlife authorities who provide original information and syntheses on Arizona's 42 raptor species with an emphasis on aspects of their natural history in Arizona. A chapter on each bird includes its description, a range map, and information on its distribution, habitat, life history, and status. Additional chapters cover conservation, habitats, where and when to watch raptors, and the sport of falconry. The book is enhanced by 42 full color illustrations by Richard Sloan, one of the premier wildlife artists in North America whose paintings were commissioned by the Arizona Wildlife Foundation specifically for this project. Co-published with the Arizona Game and Fish Department.
