Rate Adaptive Cardiac Pacing:

Rate Adaptive Cardiac Pacing Eckhard Alt, S. Serge Barold, Karl Stangl, 2012-12-06 Rate Adaptive Cardiac Pacing provides a comprehensive overview of this most advanced form of stimulating the heart by means of cardiac pacemakers that vary the pacing rate according to the needs of the patients. The heart rate is controlled by one or several sensors that detect various parameters such as respiration, blood temperature, oxygen saturation, intracardiac pressure, QT interval, stroke volume, and body activity. Besides describing the clinical and functional characteristics of these various sensors, the book also gives a clear understanding of hemodynamic aspects and, in particular, all clinical issues of importance such as indications for rate adaptive pacing and selection of the appropriate patients for rate adaptive pacemakers, with many ECG samples. The book also covers new concepts in rate adaptive pacing such as single lead atrial synchronous pacing and the combination of various sensors which are among the most recent developments in the field. With contributions from the most well-known experts in the field from all over the world, this book is the first publication to cover all the hemodynamic, clinical, and technical aspects of rate adaptive cardiac pacing. **Rate Adaptive Cardiac Pacing** Chu-Pak Lau, 1993
