

TINKERING

REMOTE SENSING ASSIGNMENT

GOOGLE EARTH ENGINE

Introduction

Google Engine is a computing software, which enables 3D presentation, primarily based on satellite images. The software program maps the Earth by collecting various photographs through satellites, aerial view, GIS data onto a 3D globe. This allows the users to see different cities and landscapes from various angles. This is user friendly, as it allows users to explore the globe by just entering addresses and coordinates of required places.
