Hudson,K. R. Drew,L. M. Baskin,1989-06 This book first published in 1989 examines the controversial position of commercial utilisation in relation to wildlife conservation Production of large mammals has earned respectability as an agricultural strategy and its evaluation has been listed as a priority requirement in the World Conservation Strategy However many authorities question whether wildlife production is a viable economic and environmental strategy and suggest that it runs counter to its claimed purpose This book evaluates this controversy by chronicling the changing role of wildlife and by reflecting on the implications of these trends The book should be of interest to people both applauding and deploring the use of wildlife in this economic role

**International Environmental Agreements and Domestic Politics** Arild Underdal,Kenneth Hanf,2019-06-04 This title was first published in 2000 In examining the domestic politics of international co operation this book addresses two important questions 1 Why do governments often take different positions in negotiations about common problems why do some states push for international regulation while others hold back 2 How can variance in the domestic implementation of and compliance with international agreements be explained why do some states deliver more than they have promised others less The authors report findings and observations from a major study which focused on efforts to establish international regulations to cope with the problem known as acid rain They provide in depth case studies of nine European countries as well as a comparative analysis searching for patterns and general conclusions »Erst stirbt der Wald, dann du!« Birgit Metzger,2015-04-02 Das Waldsterben ersch terte die westdeutsche Gesellschaft in den 1980er Jahren und beeinflusst die umweltpolitische Debatte bis heute Jenseits der Frage wie berechtigt das forstwissenschaftlich gepr gte Katastrophenszenario war gab es Anlass f r eine der wirkm chtigsten Umweltdebatten der neueren deutschen Geschichte Birgit Metzger erschlie t in ihrer Studie das Waldsterben als historisches Ph nomen im Kontext der gesellschaftspolitischen

Breitenmoser,1998-01-01 Exploring Apocalyptica Frank Uekötter,2018-08-11 Environmental alarmism has long been a political bellwether Tell me what you think about the green apocalypse and I ll tell you where you stand on the issues But as the environmental heydays of the 1970s move into perspective the time has come for a reassessment Horror scenarios create a legacy whose effects have largely escaped attention Based on case studies from four continents and the North Atlantic Exploring Apocalyptica argues for a reevaluation of familiar clich s It shows that environmentalists were less apocalyptic than commonly thought and other groups were far more enthusiastic It traces an interconnection with Cold War fears and economic depressions and demonstrates how alarmism faced limits in the Global South It also suggests that past horror scenarios impose constraints on ongoing debates At a time when climate change turns from a scenario into an experienced reality this book charts paths for an age that may have already moved beyond the peak apocalypse **The Age of Ecology**

Joachim Radkau,2014-04-03 This book is the first major study of the history of environmentalism from its origins in romanticism and the nature cults of the late 18th century to the global environmental movements of today Radkau shows that this is not a single story of the steady ascent of environmentalism but rather a multiplicity of stories each with its own dramatic tension between single issue movements and the challenges posed by the interconnection of environmental issues between charismatic leaders and bureaucratic organizations and between grassroot movements and global players While the history can be traced back several centuries environmentalism has flourished since the environmental revolution of 1970 spurred on by the Chernobyl nuclear disaster in 1986 and the growing concern about global warming While environmentalists often opposed the scientific mainstream they were also often led by scientific knowledge Environmentalism

is the true Enlightenment of our time so much so that we can call our era the age of ecology This timely and comprehensive global history of environmentalism will be essential reading for anyone concerned with the most pressing global issues of our time

*Conflicted Identities* Alexandra Staub,2015-10-23 Nation states have long used representational architecture to create symbolic identities for public consumption both at home and abroad Government buildings major ensembles and urban plans have a visibility that lends them authority while their repeated portrayals in the media cement their image as icons of a shared national character Existing in tandem with this official self however is a second often divergent identity represented by the vast realm of domestic space defined largely by those who occupy it as well as those with a vested interest in its cultural meaning Using both historical inquiry and visual spatial and film analysis this book explores the interaction of these two identities and its effect on political control class status and gender roles *Conflicted Identities* examines the politicization of both public and domestic space especially in societies undergoing rapid cultural transformation through political social or economic expansion or restructuring when cultural identity is being rapidly modernized shifted or realigned to conform to new demands Using specific examples from a variety of national contexts the book examines how vernacular housing legislation marketing and media influence a large but often underexposed domestic culture that runs parallel to a more publicly represented one As a case in point the book examines West Germany from the end of World War II to the early 1970s to probe more deeply into the mechanisms of such cultural dichotomy On a national

level post war West Germany demonstratively rejected Nazi era values by rebuilding cities based on interwar modernist tenets while choosing a decidedly modern and transparent architecture for high visibility national projects In the domestic realm government media and everyday citizens countered this turn to state sponsored modernism by embracing traditional architectural aesthetics and housing that encouraged patriarchal family structures Written for readers interested in cultural theory history and the politics of space as well as those engaged with architecture and the built environment *Conflicted Identities* provides an engaging new perspective on power and identity as they relate to architectural settings

*Agroforestry in Europe* Antonio Rigueiro-Rodríguez, Jim McAdam, María Rosa Mosquera-Losada, 2008-11-09 Agroforestry has come of age during the past three decades The age old practice of growing trees and crops and sometimes animals in interacting combinations that has been ignored in the single commodity oriented agricultural and forestry development paradigms has been brought into the realm of modern land use Today agroforestry is well on its way to becoming a specialized science at a level similar to those of crop science and forestry science To most land use experts however agroforestry has a tropical connotation They consider agroforestry as something that can and can only be identified with the tropics That is a wrong perception While it is true that the tropics compared to the temperate regions have a wider array of agroforestry systems and hold greater promise for potential agroforestry interventions it is also true that agroforestry has several opportunities in the temperate regions too Indeed the role of agroforestry is now recognized in Europe as exemplified by this book North America and elsewhere in the temperate zone Current interest in ecosystem management in industrialized countries strongly suggests that there is a need to embrace and apply agroforestry principles to help mitigate the environmental problems caused or exacerbated by commercial agricultural and forestry production enterprises Values Cockpits Friedrich Glauner, 2017-07-25 This book answers the question of how soft factors such as corporate cultures and individual and corporate values can be transparently steered With its C4 management tool and reflecting the seven driving forces of corporate culture the Values Cockpit is a powerful solution designed to steer all dimensions and processes of a company pursuing a lean approach The book links strategic approaches on how to steer a company towards excellence with insights into the driving forces of human thoughts and actions It subsequently introduces the Values Cockpit which allows individual corporate cultures to be developed and controlled on the basis of a rational approach It has since become commonplace that for the best companies in the world it is their great corporate culture that sustains their excellence and economic success In order to establish such a corporate culture all corporate values must be thoroughly controlled steered and measured This book serves as an essential guide helping companies to reach these goals and ensure their sustainable economic success *The Politics of Biofuels, Land and Agrarian Change* Saturnino Borrás Jr., Philip McMichael, Ian Scoones, 2013-09-13 This book addresses key questions on biofuels within agrarian political economy political sociology and political ecology Contributions are based on fresh empirical materials from different parts of the world The book starts with

four key questions in agrarian political economy Who owns what Who does what Who gets what And what do they do with the surplus wealth It also addresses the emergent social and political relations in the biofuel complex and given the impacts on natural resources and sustainability engages with questions about people environment interactions At the same time the book is concerned with the politics of representation that is what are the discursive frames through which biofuels are promoted and or opposed The book analyses the institutional structures and cultures of energy consumption on which a biofuels complex depends and the alternative political and ecological visions emerging that call the biofuels complex into question Across sixteen chapters presenting material from five regions across the North South divide and focusing on fourteen countries including Brazil Indonesia India USA and Germany these topics are addressed within the following themes global re configurations agro ecological visions conflicts resistances and diverse outcomes state capital and society relations mobilising opposition creating alternatives and change and continuity This book was published as a special issue of the Journal of Peasant Studies      Pasture Landscapes and Nature Conservation Bernd Redecker, Werner Härdtle, Peter Finck, Uwe Riecken, Eckhard Schröder, 2012-12-06 One of the main problems and aims of nature conservation in Europe is to protect semi open landscapes The development during the past decades is characterized by an ongoing intensification of land use on the one hand and an increasing number of former meadows and pastures lying fallow caused by changing economic conditions on the other hand In several countries the establishment of larger pasture landscapes with a mixed character of open grassland combined with shrubs and forests has been recognized as one solution to this problem The book gives an overview of the European projects concerning to this topic nature conservation policy and strategies scientific results and practical experiences creating large scale grazing systems
