Review Of Proposed Legislation To Permit Address List Sharing By The Census Bureau Hearing:

Review of Proposed Legislation to Permit Address List Sharing by the Census Bureau United States. Congress. House. Committee on Post Office and Civil Service. Subcommittee on Census, Statistics, and Postal Personnel, 1995 Distributed to some depository libraries in microfiche *Review of Proposed Legislation to Permit Address List Sharing by the Census Bureau* ,2015-08-05 Excerpt from Review of Proposed Legislation to Permit Address List Sharing by the Census Bureau Hearing Before the Subcommittee on Census Statistics and Postal Personnel of the Committee on Post Office and Civil Service House of Representatives One Hundred Third Congress Second Session July 21 1994 The sub committee met pursuant to call at 10 a m in room 311 Cannon House Office Building Hon Thomas C Sawyer chairman of the subcommittee presiding Members present Representatives Sawyer and Petri Mr Sawyer This morning we are dealing with some of the more specific aspects of preparation for the 2000 census The topic of our hearing is to consider whether Congress needs to amend any laws to facilitate the sharing of address information that might contribute to making a more accurate census list That list of course is fundamental to any mail based census effort I think it almost goes without saying that it has long been settled in law that any information that the Census Bureau compiles is strictly confidential That has been pivotal in the matter of public confidence where we are asking Americans to bring what they feel is often sensitive information about themselves for a broad public purpose Let me first offer just a little bit of background Since the Census Bureau moved to a mail based architecture in 1960 it has assembled a national address list from a variety of sources including private companies and local governments and then finally the hard work of canvassing neighborhoods That process is often tedious and costly and for obvious reasons often far from error free What may be toughest about it though is it always starts from scratch for each census I think a lot of people would agree that if we can get beyond that it would make sense to try to prepare lists in which we could operate for less money less effort and the real emphasis on the idea of accuracy The primary goal is that sense of accuracy but a second and important goal is reducing costs One of the places that a lot of people have suggested we turn for help is to the Postal Service and here is where we get into difficulty About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works *Monthly Catalog of United States Government Publications* ,1995-04 Review of Proposed Legislation to Permit Address List Sharing by the Census Bureau United States Congress House Committe,2015-09-08 This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it This work was reproduced from the original artifact
