Review Of The Hivnet 012 Perinatal Hiv Prevention Study:

Review of the HIVNET 012 Perinatal HIV Prevention Study Institute of Medicine, Board on Population Health and Public Health Practice, Committee on Reviewing the HIVNET 012 Perinatal HIV Prevention Study, 2005-09-05 Mother to child transmission of HIV 1 afflicts hundreds of thousands of children every year especially in parts of the world such as sub Saharan Africa where HIV infection is prevalent and resources are limited This tragic reality has spurred researchers to search for an effective safe and inexpensive treatment that could reduce the risk of perinatal HIV transmission The HIVNET 012 trial was designed to provide preliminary information on the comparative safety and efficacy of two relatively simple and inexpensive short courses of oral antiretroviral treatment likely to be feasible in resource limited settings The resulting report identified some problems with procedures and documentation but concluded that these issues did not compromise the results of the study However these issues have led to public scrutiny and continued controversy Review of the HIVNET 012 Perinatal HIV Prevention Study critically and objectively evaluates the study s design and conduct and assesses the impact of the initial procedural issues on the validity of the overall findings and conclusions of the trial

Nevirapine and the Quest to End Pediatric AIDS Rebecca J. Anderson, 2014-01-23 In 1999 investigators announced that a single dose of nevirapine a new antiviral drug could stop the spread of the AIDS virus from infected mothers to their newborn babies It was a discovery that changed the face of AIDS globally but it came at a high price after years of scientific research political conflict social unrest and the loss of many thousands of lives This book is the historical account of pediatric AIDS from the first reported cases in the early 1980s to the first effective treatments in the 1990s and then to the prevention of HIV infections altogether It also includes the firsthand accounts and experiences of children infected with HIV their families and the physicians who treated them as well as the scientists who sought to understand the virus discovered nevirapine s unique properties and worked tirelessly to get it to the patients who needed it

Methodological Challenges in Biomedical HIV Prevention Trials Institute of Medicine, Board on Global Health, Committee on the Methodological Challenges in HIV Prevention Trials, 2008-06-13 The number of people infected with HIV or living with AIDS is increasing at unprecedented rates as various scientists organizations and institutions search for innovative solutions to combating and preventing the disease At the request of the Bill Melinda Gates Foundation Methodological Challenges in Biomedical HIV Prevention Trials addresses methodological challenges in late stage nonvaccine biomedical HIV prevention trials with a specific focus on microbicide and pre exposure prophylaxis trials This book recommends a number of ways to improve the design monitoring and analysis of late stage clinical trials that evaluate nonvaccine biomedical interventions The objectives include identifying a beneficial method of intervention enhancing quantification of the impact properly assessing the effects of using such an intervention and reducing biases that can lead to false positive trial results According to

Methodological Challenges in Biomedical HIV Prevention Trials the need to identify a range of effective practical and affordable preventive strategies is critical Although a large number of promising new HIV prevention strategies and products are currently being tested in late stage clinical trials these trials face a myriad of methodological challenges that slow the pace of research and limit the ability to identify and fully evaluate effective biomedical interventions

Preparing for the Future of HIV/AIDS in Africa Institute of Medicine, Board on Global Health, Committee on Envisioning a Strategy to Prepare for the Long-Term Burden of HIV/AIDS: African Needs and U.S. Interests, 2011-04-28 HIV AIDS is a catastrophe globally but nowhere more so than in sub Saharan Africa which in 2008 accounted for 67 percent of cases worldwide and 91 percent of new infections The Institute of Medicine recommends that the United States and African nations move toward a strategy of shared responsibility such that these nations are empowered to take ownership of their HIV AIDS problem and work to solve it

Limited Boxed Set: The Real Anthony Fauci Robert F. Kennedy Jr., 2023-02-14 1 on AMAZON and a NEW YORK TIMES WALL STREET JOURNAL USA TODAY and PUBLISHERS WEEKLY NATIONAL BESTSELLER Pharma funded mainstream media has convinced millions of Americans that Dr Anthony Fauci is a hero He is anything but As director of the National Institute of Allergy and Infectious Diseases NIAID Dr Anthony Fauci dispenses 6.1 billion in annual taxpayer provided funding for scientific research allowing him to dictate the subject content and outcome of scientific health research across the globe Fauci uses the financial clout at his disposal to wield extraordinary influence over hospitals universities journals and thousands of influential doctors and scientists whose careers and institutions he has the power to ruin advance or reward During more than a year of painstaking and meticulous research Robert F Kennedy Jr unearthed a shocking story that obliterates media spin on Dr Fauci and that will alarm every American Democrat or Republican who cares about democracy our Constitution and the future of our children's health The Real Anthony Fauci reveals how America's Doctor launched his career during the early AIDS crisis by partnering with pharmaceutical companies to sabotage safe and effective off patent therapeutic treatments for AIDS Fauci

orchestrated fraudulent studies and then pressured US Food and Drug Administration FDA regulators into approving a deadly chemotherapy treatment he had good reason to know was worthless against AIDS. Fauci repeatedly violated federal laws to allow his Pharma partners to use impoverished and dark skinned children as lab rats in deadly experiments with toxic AIDS and cancer chemotherapies. In early 2000, Fauci shook hands with Bill Gates in the library of Gates' 147 million Seattle mansion, cementing a partnership that would aim to control an increasingly profitable 60 billion global vaccine enterprise with unlimited growth potential. Through funding leverage and carefully cultivated personal relationships with heads of state and leading media and social media institutions, the Pharma-Fauci-Gates alliance exercises dominion over global health policy. The Real Anthony Fauci details how Fauci, Gates, and their cohorts use their control of media outlets, scientific journals, key government and quasi-governmental agencies, global intelligence agencies, and influential scientists and physicians to flood the public with fearful propaganda about COVID-19 virulence and pathogenesis and to muzzle debate and ruthlessly censor dissent.

Encyclopedia of Health Services Research Ross M. Mullner, 2009-05-20. Within two volumes, more than 400 signed entries and their associated bibliographies and recommended readings authoritatively cover issues in both the historical and contemporary context of health services research.

Serious Adverse Events Celia Farber, 2023-03-23. Farber is a lucid and courageous witness to the power play behind the first scamdemic. Her work is journalism at its best: solid, lucid, and humane, attacking wrongs that few dare touch and thereby helping right them. Mark Crispin Miller, bestselling author and professor of media studies at NYU. On April 23, 1984, in a packed press conference room in Washington DC, the secretary of health and human services declared, "The probable cause of AIDS has been found." By the next day, "probable" had fallen away, and the novel retrovirus, later named HIV, became forever lodged in global consciousness as the AIDS virus. Celia Farber, then an intrepid young reporter for SPIN magazine, was the only journalist to question the official narrative and dig into the science of AIDS. She reported on the evidence that was being continually cited and repeated by health officials and the press: the deadliness of AZT and Dr. Fauci's trials on children, infants, and pregnant mothers. Throughout Faber's reportage, it was largely ignored. She was maligned, maliciously attacked, and ultimately canceled. Now, forty years after her original reporting, Farber's *Serious Adverse Events: An Uncensored History of AIDS* is reissued with a new foreword by Mark Crispin Miller, shining much-needed light on her groundbreaking work once again. More relevant than ever, this book serves as an essential foundation to understanding its catastrophic sequel, COVID-19. *Serious Adverse Events* makes clear that the tactics employed at the height of HIV/AIDS—the fearmongering, cancel culture, and woke takeover of science, medicine, and journalism—persist today. The response to COVID-19 isn't new; it is a well-trodden and dangerous path in the social landscape. Groundbreaking work. Bob Guccione Jr., founder of SPIN magazine.

Preventing HIV Infection Among Injecting Drug Users in High-Risk Countries Institute of Medicine, Board on Global Health, Committee on the Prevention of HIV Infection Among Injecting Drug Users in High-Risk Countries, 2006-12-20. Drug dependence is a complex, chronic, relapsing condition that is often accompanied by

severe health psychological economic legal and social consequences Injecting drug users are particularly vulnerable to HIV and other bloodborne infections such as hepatitis C as a result of sharing contaminated injecting equipment All drug dependent individuals including injecting drug users IDUs may be at increased risk of HIV infection because of high risk sexual behaviors There are an estimated 13.2 million injecting drug users IDUs world wide 78 percent of whom live in developing or transitional countries The sharing of contaminated injecting equipment has become a major driving force of the global AIDS epidemic and is the primary mode of HIV transmission in many countries In some cases epidemics initially fueled by the sharing of contaminated injecting equipment are spreading through sexual transmission from IDUs to non injecting populations and through perinatal transmission to newborns Reversing the rise of HIV infections among IDUs has thus become an urgent global public health challenge one that remains largely unmet In response to this challenge the Institute of Medicine convened a public workshop in Geneva in December 2005 to gather information from experts on IDU driven HIV epidemics in the most affected regions of the world with an emphasis on countries throughout Eastern Europe the Commonwealth of Independent States and significant parts of Asia Experts from other regions also provided information on their experiences in preventing HIV infection among IDUs This report provides a summary of the workshop discussions Preventing HIV Infection among Injecting Drug Users in High Risk Countries describes the evidence on the intermediate outcomes of drug related risk and sex related risk prior to examining the impact on HIV transmission This report focuses on programs that are designed to prevent the transmission of HIV among injecting drug users These programs range from efforts to curtail non medical drug use to those that encourage reduction in high risk behavior among drug users Although the report focuses on HIV prevention for IDUs in high risk countries the Committee considered evidence from countries around the world The findings and recommendations of this report are also applicable to countries where injecting drug use is not the primary driver but in which injection drug use is nevertheless associated with significant HIV transmission
