Michalski,George Tecuci,1994-02-09 Multistrategy learning is one of the newest and most promising research directions in the development of machine learning systems The objectives of research in this area are to study trade offs between different learning strategies and to develop learning systems that employ multiple types of inference or computational paradigms in a learning process Multistrategy systems offer significant advantages over monostrategy systems They are more flexible in the type of input they can learn from and the type of knowledge they can acquire As a consequence multistrategy systems have the potential to be applicable to a wide range of practical problems This volume is the first book in this fast growing field It contains a selection of contributions by leading researchers specializing in this area See below for earlier volumes in the series Belief Revision Peter Gärdenfors,2003-12-04 Belief revision is a topic of much interest in theoretical computer science and logic and it forms a central problem in research into artificial intelligence This book contains a collection of research articles on belief revision that are right up to date and an introductory chapter that presents a survey of current research in the area and the fundamentals of the theory **KI 2015: Advances in Artificial Intelligence** Steffen Hölldobler,Markus Krötzsch,Rafael Peñaloza,Sebastian Rudolph,2015-09-29 This book constitutes the refereed proceedings of the 38th Annual German Conference on Artificial Intelligence KI 2015 held in Dresden Germany in September 2015 The 15 revised full technical papers presented together with 14 technical communications 4 doctoral consortium contributions and 3 keynotes were carefully reviewed and selected from 58 submissions The conference provides the opportunity to present a wider range of results and ideas that are of interest to the KI audience including reports about recent own publications position papers and previews of ongoing work **The Logic of Theory Change** Andre Fuhrmann,Michael

Intelligence,1994   Belief Change Dov M. Gabbay,Philippe Smets,2012-12-06 Belief change is an emerging field of artificial intelligence and information science dedicated to the dynamics of information and the present book provides a state of the art picture of its formal foundations It deals with the addition deletion and combination of pieces of information and more generally with the revision updating and fusion of knowledge bases The book offers an extensive coverage of and seeks to reconcile two traditions in the kinematics of belief that often ignore each other the symbolic and the numerical often probabilistic approaches Moreover the work encompasses both revision and fusion problems even though these two are also commonly investigated by different communities Finally the book presents the numerical view of belief change beyond the probabilistic framework covering such approaches as possibility theory belief functions and convex gambles The work thus presents a unified view of belief change operators drawing from a widely scattered literature embracing philosophical logic artificial intelligence uncertainty modelling and database systems The material is a clearly organised guide to the literature on the dynamics of epistemic states knowledge bases and uncertain information suitable for scholars and graduate students familiar with applied logic knowledge representation and uncertain reasoning
