Revitalizing The Older Suburb:

Revitalizing the Older Suburb David Listokin, W. Patrick Beaton, 1983 **Economic Revitalization** Joan Fitzgerald, Nancey Green Leigh, 2002-03-19 Economic Revitalization is unique in that it discusses leading revitalization strategies in the context of both city and suburban settings offering case studies of program development and implementation In *Economic Revitalization Cases and Strategies for City and Suburb* Fitzgerald and Leigh answer the need for a text that incorporates social justice and sustainability into how we think about and practice economic development It is one of the first to talk about how revitalization strategies are implemented in both cities and suburbs particularly inner ring suburbs that are experiencing decline previously associated only with inner city neighborhoods After setting the context with a brief history of economic development practice and its shortcomings Fitzgerald and Leigh focus on six economic development strategies sectoral strategies Brownfield redevelopment industrial retention commercial revitalization industrial and office property reuse and workforce development Each of these chapters begins with an overview of the strategy and then presents cases of how it is being implemented The cases draw from Atlanta Chicago and its suburbs Emeryville Kalamazoo Louisville New Haven Portland Sandy Springs and Seattle and suburban King County They illustrate the tradeoffs often made in achieving one goal at the expense of another Although they admit that some of the cases come up short in illustrating a more equitable and sustainable economic development practice Fitzgerald and Leigh conclude with an optimistic view that the field is changing The book is aimed at students and practitioners of economic development planning who seek to foster stronger economies and greater opportunity in inner cities and older suburbs It is also meant to assist planners in thriving new towns and suburban communities seeking to avoid future economic decline as their communities mature *Economic Revitalization* Discusses practice in both suburban and inner city settings Integrates the planning values of social justice and sustainability into the discussion of implementation strategies Includes cases that reveal the political nature of the planning process and the types of tradeoffs that often must be made Provides insights for planners seeking to adopt best practice programs from other localities **Developing for the Future**, 2000 Reengineering Community Development for the 21st Century Donna Fabiani, Terry F. Buss, 2015-07-17 This timely book takes a wide angled look at how the field of community development is evolving in an era of reduced resources changing priorities privatization competition and performance management at the federal state and local government levels as well as for non profits and private sector entities It shows how community development organizations and programs are offering many new services entering into new partnerships developing extensive networks and attracting new and alternative sources of funding and how in the process these organizations are becoming more innovative leaner in their operations more competitive and much more effective than ever before Students researchers and policy makers will all appreciate the numerous policy examples from the local state and federal levels including a wide range of developments in housing transportation smart growth education and crime

prevention Reengineering Community Development for the 21st Century is an invaluable source for insights into the latest developments in community development financing and performance management *Immigration and Metropolitan Revitalization in the United States* Domenic Vitiello, Thomas J. Sugrue, 2017-04-25 After decades of urban crisis American cities and suburbs have revived thanks largely to immigration This is the first book to explore the phenomenon from big cities such as New York Chicago and Los Angeles to newer destinations such as Nashville and suburban Boston and New Jersey

The Limitless City Oliver Gillham, 2002-03 One of the great debates of our time concerns the predominant form of land use in America today the all too familiar pattern of commercial and residential development known as sprawl But what do we really know about sprawl Do we know what it is Where did it come from Is it really so bad If so what are the alternatives Can anything be done to make it better The Limitless City offers an accessible examination of those and related questions Oliver Gillham an architect and planner with more than twenty five years of experience in the field considers the history and development of sprawl and examines current debates about the issue The book offers a comprehensive definition of sprawl in America traces the roots of sprawl and considers the factors that led to its preeminence as an urban and suburban form reviews both its negative impacts loss of open space increased pollution gridlock as well as its positive aspects economic development personal freedom privacy considers responses to sprawl including smart growth urban growth boundaries regional planning and the New Urbanism looks at what can be done to improve and counterbalance sprawl The author argues that whether we like it or not sprawl is here to stay and only by understanding where it came from and why it developed will we be able to successfully address the problems it has created and is likely to create in the future The Limitless City is the first book to provide a realistic look at sprawl with a frank recognition of its status as the predominant urban form in America now and into the near future Rather than railing against it Gillham charts its probable future course while describing critical efforts that can be undertaken to improve the future of sprawl and our existing urban core areas

Urban Revitalization Carl Grodach, Renia Ehrenfeucht, 2015-12-22 Following decades of neglect and decline many US cities have undergone a dramatic renaissance From New York to Nashville and Pittsburgh to Portland governments have implemented innovative redevelopment strategies to adapt to a globally integrated post industrial economy and cope with declining industries tax bases and populations However despite the prominence of new amenities in revitalized neighborhoods spectacular architectural icons and pedestrian friendly entertainment districts the urban comeback has been highly uneven Even thriving cities are defined by a bifurcated population of creative class professionals and a low wage low skilled workforce Many are home to diverse and thriving immigrant communities but also contain economically and socially segregated neighborhoods They have transformed high profile central city brownfields but many disadvantaged neighborhoods continue to grapple with abandoned and environmentally contaminated sites As urban cores boom inner ring suburban areas increasingly face mounting problems while other shrinking cities continue to wrestle with long term decline

The Great Recession brought additional challenges to planning and development professionals and community organizations alike as they work to maintain successes and respond to new problems. It is crucial that students of urban revitalization recognize these challenges, their impacts on different populations, and the implications for crafting effective and equitable revitalization policy. *Urban Revitalization: Remaking Cities in a Changing World* will be a guide in this learning process. This textbook will be the first to comprehensively and critically synthesize the successful approaches and pressing challenges involved in urban revitalization. The book is divided into five sections. In the introductory section, we set the stage by providing a conceptual framework to understand urban revitalization that links a political economy perspective with an appreciation of socio-cultural factors in explaining urban change. Stemming from this, we will explain the significance of revitalization and present a summary of the key debates, issues, and conflicts surrounding revitalization efforts. Section II will examine the historical causes for decline in central city and inner ring suburban areas and shrinking cities and building from the conceptual framework. Section III will discuss theory useful to explain the factors that shape contemporary revitalization initiatives and outcomes. Section IV will introduce students to the analytical techniques and key data sources for urban revitalization planning. Section V will provide an in-depth critical discussion of contemporary urban revitalization policies, strategies, and projects. This section will offer a rich set of case studies that contextualize key themes and strategic areas across a range of contexts, including the urban core, central city neighborhoods, suburban areas, and shrinking cities. Lastly, Section V concludes by reflecting on the current state of urban revitalization planning and the emerging challenges the field must face in the future. *Urban Revitalization* will integrate academic and policy research with professional knowledge and techniques. Its key strength will be the combination of a critical examination of best practices and innovative approaches with an overview of the methods used to understand local situations and urban revitalization processes. A unique feature will be chapter-specific case studies of contemporary urban revitalization projects and questions geared toward generating classroom discussion around key issues. The book will be written in an accessible style and thoughtfully organized to provide graduate and upper-level undergraduate students with a comprehensive resource that will also serve as a reference guide for professionals.

Gentrification, Displacement, and Neighborhood Revitalization J. John Palen, Bruce London, 1985-06-30 Bringing an empirical, objective approach to a topic that has often been the source of emotional and uninformed controversy, *Gentrification, Displacement, and Neighborhood Revitalization* provides an introduction to major issues in urban revitalization, new research findings, and a discussion of theoretical perspectives. This is the first broad-based survey of a scattered literature that has not been readily accessible. The book's comprehensive introduction leads to informative analyses of new research by sociologists, planners, geographers, and urban studies faculty. A concluding essay examines the present state of knowledge about gentrification and discusses its implications, suggesting future developments and trends. **Revitalizing the City** Fritz W. Wagner, Timothy E. Joder, Anthony J. Mumphrey, Jr., Krishna M. Akundi, Alan F.J. Artibise, 2016-12-05 This

practical work demonstrates that controlling urban growth and reviving central city economies are not mutually exclusive endeavors Rather than re hash theories of urban development the contributors describe and evaluate successful community tested approaches to sustaining our cities Revitalizing the City provides actual case examples of urban success stories ranging from San Diego s smart growth initiative to brownfield redevelopment in Pittsburgh The book is divided into four major sections Urban Growth Metropolitan Development and Administration Central City Redevelopment Strategies and Central City Suburban Cooperation Each chapter includes an analysis of key issues descriptions of specific local initiatives highlights of effective policies or programs and potential pitfalls to avoid Revitalizing the City has broad appeal for the urban policy community as well as for undergraduate and graduate courses in urban sociology geography political science and urban studies and planning
