River of Lost Dreams Pat Kelley, 1986-01-01 **River of Lost Dreams** Pat Kelley, 1986 Globalizing the Lower Rio Grande Kyle B. Carpenter, 2024-10-15 Often obscured in the history of the nineteenth century US Mexico borderlands European born entrepreneurs played a definitive role in pushing the Rio Grande borderlands into Atlantic markets These borderlands entrepreneurs tried to transform the Lower Rio Grande and its surroundings from a regional crossroads of trade to a hub of the Atlantic economy Though they were often stymied by mismanagement notions of ethnic and cultural superiority and eruptions of violence these entrepreneurs persistently attempted to remake the region into a modern commercial utopia Their actions challenged United States imperial expansion into the Rio Grande borderlands as they tried to modernize the region according to European cultural precepts through constructing colonies populated with Europeans building strong networks of local and global significance and striving to dominate trade in the region *Globalizing the Lower Rio Grande* reframes the narrative of the borderlands through the perspectives of Europeans who actively shaped the historical trajectory of the region It highlights the actions of folks like English born John C Beales who convinced a party of Europeans to trek overseas and overland to the isolated Las Moras Creek to build a colony from scratch Alexander Bourgeois d Orvanne former mayor of Clichy la Garenne in France who manipulated powerful French and German leaders to support a settlement scheme on the Rio Grande Spanish born Jos San Rom n and the way he constructed massive transatlantic networks of credit and exchange and Joseph Kleiber from Strasbourg who facilitated the construction of a European owned railroad line along the Rio Grande Though ultimately undermined and outmaneuvered by their American rivals European born borderlands entrepreneurs like these collectively globalized the Lower Rio Grande A History of Navigation on Cypress Bayou and the Lakes Jacques D. Adams (Jr.), 2008 Laredo is a city at the crossroads of North American history Founded by the Spanish in 1755 it has stood at the intersection of regional commerce since its earliest days Now John A Adams Jr provides the first ever panoramic business and economic history of Laredo He traces the evolution of the region from its early days as a ranching center into the mid twentieth century when Laredo had become what it remains today a booming port of trade and a principal center of commerce and financial services on the southern border of the United States In *Commerce and Conflict on the Rio Grande* Adams demonstrates how the increasingly diversified economy of the region fed the fortunes of the city His narrative buttressed throughout by tables and statistics paints a vivid mural of both the economic forces and the farsighted and ambitious individuals that combined to

bring prosperity to this unique American city Readers will find a wealth of insights into regional economics history and borderlands themes

José María de Jesús Carvajal Joseph E. Chance, 2012-08-31 Jos María de Jesús Carvajal is both a biography of a Mexican postrevolutionary and a study of the development of a new border between Mexico and the United States during the crucial decades of the early to mid nineteenth century The work examines the challenges faced by Carvajal a bilingual bicultural character in confusing times against the historical backdrop of the history of colonial Texas and northern Mexico Chance has chosen to focus on a political military figure whose career stretches from the Texas Revolution to the French Intervention Carvajal played a key role in the violent struggle between the liberal and conservative political factions that vied for control of the Republic of Mexico from 1830 to 1874 He was the leader of a mercenary army that invaded Mexico from the United States in 1851 in an unsuccessful attempt for the creation of the so called independent Republic of the Sierra Madre In addition he played significant roles in the struggle for Texas Independence and formation of the ill fated Republic of the Rio Grande and he opposed the American occupation of northern Mexico during the Mexican American War the War of Reform that solidified liberal control of Mexico under the leadership of Benito Juárez and the French Intervention into Mexico Carvajal's life and exploits have been largely overlooked by contemporary historians This work sheds new light on several important chapters in the history of Texas and northern Mexico

Littlefield, 2012-11-27 The history of the Rio Grande since the late nineteenth century reflects the evolution of water resource management in the West It was here that the earliest interstate and international water allocation problems pitted irrigators in southern New Mexico against farmers downstream in El Paso and Juárez with the voluntary resolution of that conflict setting important precedents for national and international water law In this first scholarly treatment of the politics of water law along the Rio Grande Douglas R Littlefield describes those early interstate and international water apportionment conflicts and explains how they relate to the development of western water law and policy and to international relations with Mexico Littlefield embraces environmental legal and social history to offer clear analyses of appropriation and riparian water rights doctrines along with lucid accounts of court cases and laws Examining events that led up to the 1904 settlement among U S and Mexican communities and the formation of the Rio Grande Compact in 1938 Littlefield describes how communities grappled over water issues as much with one another as with governmental authorities Conflict on the Rio Grande reveals the transformation of nineteenth and early twentieth century law traces changing attitudes about the role of government and examines the ways these changes affected the use and eventual protection of natural resources Rio Grande water policy Littlefield shows represents federalism at work and shows the West in one locale at least coming to grips with its unique problems through negotiation and compromise

Eugene George, 2016-11-01 In 1865 Heinrich Portscheller emigrated to Mexico from his native Germany perhaps motivated by a desire to avoid compulsory military service in the Austro Prussian War The scion of a well known family of masons and master builders he had the misfortune to disembark at Veracruz during the Franco Mexican War Portscheller and his traveling companion were impressed into the imperialist forces and sent to northern Mexico Sometime following the Battle of Santa Gertrudis in 1866 Portscheller deserted the army and eventually made a place for himself in Roma a small town in Starr County Texas Over the next decades Portscheller acquired a reputation as a master builder and architect He brought to the Lower Rio Grande Valley his long heritage of Old World building knowledge and skills and integrated them with the practices of local Mexican construction and vernacular architecture However despite his many contributions to the distinctive architecture of Roma and surrounding places by the mid twentieth century he was largely forgotten During nearly fifty years of historical sleuthing in South Texas and Germany W Eugene George reconstructed many of the details of the life and career of this important South Texas craftsman Containing editorial contributions by Mary Carolyn Hollers George and featuring a foreword by Mari Eugenia Guerra and a concluding assessment by noted architectural historian Stephen Fox *Master Builder of the Lower Rio Grande* Heinrich Portscheller at last permits a long overdue appreciation of the legacy of this influential architect and builder of the Texas Mexico borderlands

From Presidio to the Pecos River Orville B. Shelburne, Jr., 2020-10-08 The 1848 treaty of Guadalupe Hidalgo that ended the Mexican American War described a boundary between the two countries that was to be ascertained by a joint boundary commission effort The section of the boundary along the Rio Grande from Presidio to the mouth of the Pecos River was arguably the most challenging and it was surveyed by two American parties one led by civilian surveyor M T W Chandler in 1852 and the second led by Lieutenant Nathaniel Michler in 1853 Our understanding of these two surveys across the greater Big Bend has long been limited to the official reports and maps housed in the National Archives and never widely published The discovery by Orville B Shelburne of the journal kept by Dr Charles C Parry surgeon botanist geologist for the 1852 party has dramatically enriched the story by giving us a firsthand view of the Chandler boundary survey as it unfolded Parry s journal forms the basis of From Presidio to the Pecos River which documents the day to day working of the survey teams The story Shelburne tells is one of scientific exploration under duress surveyors stranded in towering canyons overnight without food or shelter piloting inflatable rubber boats down wild rivers rising to the challenges of a profoundly remote area including the possibility of Indian attack Shelburne s comparison of the original boundary maps with their modern counterparts reveals the limitations of terrain and equipment on the survey teams Shelburne s book provides a window on the adventure near disaster and true accomplishment of the surveyors work in documenting the course of the Rio Grande across the Big Bend region
