Environment, 1960-1979 Susannah Bieber, 2023-07-31 This volume reframes the development of US American avant garde art of the long 1960s from minimal and pop art to land art conceptual art site specific practices and feminist art in the context of contemporary architectural discourses Susannah Bieber analyzes the work of seven major artists Donald Judd Robert Grosvenor Claes Oldenburg Robert Smithson Lawrence Weiner Gordon Matta Clark and Mary Miss who were closely associated with the formal aesthetic innovations of the period While these individual artists came to represent diverse movements Bieber argues that all of them were attracted to the field of architecture the work of architects engineers preservationists landscape designers and urban planners because they believed these practices more directly shaped the social and material spaces of everyday life This book's contribution to the field of art history is thus twofold First it shows that the avant garde of the long 1960s did not simply develop according to an internal logic of art but also as part of broader sociocultural discourses about buildings and cities Second it exemplifies a methodological synthesis between social art history and poststructural formalism that is foundational to understanding the role of art in the construction of a more just and egalitarian society The book will be of interest to scholars working in art history architecture urbanism and environmental humanism **Allan Kaprow, Robert Smithson, and the Limits to Art** Philip Ursprung, Fiona Elliott, 2013-05-10 This innovative study of two of the most important artists of the twentieth century links the art practices of Allan Kaprow and Robert Smithson in their attempts to test the limits of art both what it is and where it is Ursprung provides a sophisticated yet accessible analysis placing the two artists firmly in the art world of the 1960s as well as in the art historical discourse of the following decades Although their practices were quite different they both extended the studio and gallery into desert landscapes abandoned warehouses industrial sites train stations and other spaces Ursprung bolsters his argument with substantial archival research and sociological and economic models of expansion and limits **Anywhere or Not at All** Peter Osborne, 2013-06-04 A new reading of the philosophy of contemporary art by the author of The Politics of Time Contemporary art is the object of inflated and widely divergent claims But what kind of discourse can open it up effectively to critical analysis Anywhere or Not at All is a major philosophical intervention in art theory that challenges the terms of established positions through a new approach at once philosophical historical social and art critical Developing the position that contemporary art is postconceptual art the book progresses through a dual series of conceptual constructions and interpretations of particular works to assess the art from a number of perspectives contemporaneity and its global context art against aesthetic the Romantic pre history of conceptual art the multiplicity of modernisms transcategoriality conceptual abstraction photographic ontology digitalization and the institutional and existential complexities of art space and art time Anywhere or Not at All maps out the conceptual space for an art that is both critical and contemporary in the era of global capitalism Winner of the 2014 Annual Book Prize of the Association for the Study of the Arts of the Present USA
