MARKET INTEGRATION BETWEEN WILD AND FARMED FISH IN MEDITERRANEAN COUNTRIES Food and Agriculture Organization of the United Nations, 2018-11-08 Market integration occurs when prices among different locations or related goods follow similar patterns over time Current knowledge on market integration between aquaculture and wild caught fish is based on a small number of species and markets Most studies show the existence of market integration between wild and farmed conspecifics However there are some ambiguous results for European seabass and gilthead seabream in southern European countries in the literature In this study we investigate the existence of market integration between wild and farmed conspecifics for European seabass and gilthead seabream as well as several other key species in southern European countries

Sustainable Market Economy Hermann Witte, 2015 The Lingener Studies of Management and Technology have mainly two objectives First there is the objective to stimulate and to support a critical and balanced integration of two different orientated disciplines of science The second objective is to overcome the monistic approach of science and to promote a pluralistic and holistic approach The holistic approach leads to an enlarged knowledge bringing better decision advices of science for practice This particular enlarged knowledge does not only give a better foundation to realize solution for the overcoming of crises but it also can prevent crises in democratic economic systems The sustainable market economy is based on the idea of the United Nations to install a worldwide sustainable development process The objective of this process is to reduce the difference between poor and rich countries The concept of the sustainable market economy is founded on the basic idea of economics to realize market equilibria Adam Smith It is shown that economic equilibria also ensure economic sustainability Because economic crises are present in economic disequilibria the realization of the economic sustainability prevents systemic self made economic crises and also ensures welfare So it is logical to realize economic sustainability consequently in spite of the dominance of political compromises in democratic societies
