Sculpture Renaissance To Rococo A History Of Western Sculpture:

Sculpture: Renaissance to Rococo Herbert Keutner, 1969 A History of Western Sculpture Herbert Keutner, John Pope-Hennessy, 1969 **The History of Western Sculpture** Peter Osier, 2015-07-15 This detailed overview traces the story of western sculpture from its beginnings to the present day passing through the Aegean classical Greek Roman Byzantine Medieval Renaissance Baroque Neoclassical Romantic and Modern periods along the way The text explains how Western sculpture evolved over time as it adapted to changing cultural contexts All the while the book also highlights influential sculptors and key works Rich in detail highly informative and wide ranging and lavishly illustrated with photographs of the leading examples of sculpture from each period this volume deserves an honored place in every school and library The Oxford History of Western Art Martin Kemp, 2000 The Oxford History of Western Art is the new authority on the development of visual culture in the West over the last 2700 years from the classical period to the end of the twentieth century OHWA is an innovative and challenging reappraisal of how the history of art can be presented and understood None of the currently available general histories of art offers the wealth of perspectives and cross media references of this book Through a carefully devised modular structure readers are given insights not only into how and why works of art were created but also how works in different media relate to each other across time Here uniquely is not the simple linear story of art but a rich series of stories told from varying viewpoints The founding principle of the book has been to use carefully selected groupings of pictures to give readers a sense of the visual texture of the various periods and episodes covered The 167 illustration groups supported by explanatory text and picture captions create a sequence of visual tours not merely a procession of individually great works viewed in isolation but juxtapositions of significant images that powerfully convey a sense of the visual environments in which works of art need to be viewed in order to be understood and appreciated The aim throughout has been to make the shape and nature of these visual presentations a stimulating and rewarding experience allowing readers to become active participants in the process of interpretation and synthesis Another key feature of the narrative is the redefinition of traditional period boundaries Rather than relying on conventional labels such as Medieval Renaissance Baroque etc five major phases of significant historical change are established that unlock longer and more meaningful continuities The art of classical antiquity from c 600 BC to the fall of Rome in AD 410 The establishment of visual culture in Europe from 410 to 1527 the sack of papal Rome European visual regimes from 1527 to 1770 The era of revolutions 1770 to 1914 Modernism and after 1914 to 2000 This new framework shows how the major religious and secular functions of art have been forged sustained transformed revived and revolutionized over the ages how the institutions of Church and State have consistently aspired to make art in their own image and how the rise of art history itself has come to provide the dominant conceptual framework within which artists create patrons patronize collectors collect galleries exhibit dealers deal and art historians write The text has been written by a team of 50 specialist authors working under the direction of Professor Martin Kemp one

of the UK's most distinguished art historians. Whilst bringing their own expertise and vision to their sections, each author was also asked to relate their text to a number of unifying themes and issues including written evidence, physical contexts, patronage, viewing and reception techniques, gender and racial issues, centres and peripheries, media and condition, the notion of art and current presentations. Though the coverage of topics focuses on European notions of art and their transplantation and transformation in North America, space is also given to cross-fertilizations with other traditions including the art of Latin America, the Soviet Union, India, Africa and Afro-Caribbean, Australia and Canada. Professor Kemp and his team similarly deal generously with the applied arts and reproductive media such as photography and prints. The result is a vibrant, vigorous and revolutionary account of Western art, serving both as an inspirational introduction for the general reader and an authoritative source of reference and guidance for students.

The Art of Art History Donald Preziosi, 2009-02-26. What is art history? Why, how and where did it originate and how have its methods changed over time? The history of art has been written and rewritten since classical antiquity. Since the foundation of the modern discipline of art history in Germany in the late eighteenth century, debates about art and its histories have intensified. Historians, philosophers, psychologists and anthropologists among others have changed our notions of what art history has been, is and might be. This anthology is a guide to understanding art history through critical reading of the field's most innovative and influential texts focusing on the past two centuries. Each section focuses on a key issue: art as history, aesthetics, form, content and style, anthropology, meaning and interpretation, authorship and identity, and the phenomenon of globalization. More than thirty readings from writers as diverse as Winckelmann, Kant, Mary Kelly and Michel Foucault are brought together with editorial introductions to each topic, providing background information, bibliographies and critical elucidations of the issues at stake. This updated and expanded edition contains sixteen newly included extracts from key thinkers in the history of art, from Giorgio Vasari to Walter Benjamin and Satya Mohanty, a new section on globalization and also a new concluding essay from Donald Preziosi on the tasks of the art historian today.
