Seabird Numbers and Breeding Success in Britain and Ireland, 2004, 2005 *Seabird Numbers and Breeding Success in Britain and Ireland, 2006* Roddy A. Mavor, 2008 *Seabird numbers and breeding success in Britain and Ireland, 1996* Kate R. Thompson, E. Brindley, Martin Heubeck, 1997 *Seabird Numbers and Breeding Success in Britain and Ireland, 2002* Roddy A. Mavor, M. Parsons, G. Pickerell, 2003 Presents the results of monitoring of seabird populations and breeding performance throughout Britain and Ireland in 2002 and makes comparisons with previous years This report is produced annually as part of the JNCC's Seabird Monitoring Programme *The Status of Birds in Britain and Ireland* David Parkin, Alan Knox, 2010-01-01 A detailed and up to date assessment of the status and distribution of every species of bird in Britain and Ireland *Pelicans, Cormorants, and their Relatives* J. Bryan Nelson, 2006-01-26 The pelecaniformes are a large and important group of seabirds containing many spectacular species This book addresses the breeding biology of the six pelecaniform families which comprise the closely related core groups pelicans cormorants shags darters gannets boobies and their more distant relatives the frigate birds and tropic birds Many fundamental questions can be addressed through the pelecaniformes Why do they breed in colonies What are the links between their feeding methods and their reproduction What part does territorial and pairing behaviour play in their life cycles These and scores of comparable issues including those related to man are woven here into a richly interpretative text The author's approach to the subject is threefold First the pelecaniformes are placed within the framework of four discrete disciplines with chapters on evolutionary relationships comparative behaviour ecology and the birds relationship with humans Secondly each of the six families is discussed elucidating the range of taxonomy behaviour and ecology within each Finally we progress to specific level using the same structure as for the family accounts In this way each of the 60 odd species can be understood not just as discrete units but as part of their family and order The book is unique in its coverage of the entire order and in its combination of facts and interpretation Pelicans Cormorants and their Allies will enable readers not only to identify the many spectacular species which make up this large and important group of seabirds but also to understand their breeding biology *Conserving Bird Biodiversity* Ken Norris, Deborah J. Pain, 2002-06-06 The earth's biodiversity currently faces an extinction crisis that is unprecedented Conservationists attempt to intervene in the extinction process either locally by protecting or restoring important species and habitats or at national and international levels by influencing key policies and promoting debate Reliable information is the foundation upon which these efforts are based which places research at the heart of biodiversity conservation The role of research in such conservation is diverse It includes understanding why biodiversity is important defining units of biodiversity priority setting for species and sites managing endangered and declining populations understanding large scale processes making predictions about the future and interfacing with training education public awareness and policy initiatives Using examples from a wide range of bird conservation work worldwide researchers

consider the principles underlying these issues and illustrate how these principles have been applied to address actual conservation problems for students practitioners and researchers in conservation biology The Changing Wildlife of Great Britain and Ireland David L. Hawksworth,2003-06-26 Periodic comprehensive overviews of the status of the diverse organisms that make up wildlife are essential to determining trends threats and future prospects Just over 25 years ago leading authorities on different kinds of wildlife came together to prepare an assessment of their status of a wide range of organisms in Great Britain and Ireland i ICES Cooperative Research Report ,1999 Report of the ICES Advisory Committee on Ecosystems, 2001, Copenhagen, 27-30 August 2001 ICES Advisory Committee on Ecosystems,2001 **Report of the ICES Advisory Committee on the Marine Environment, 1999, Copenhagen, Denmark, 31 May-5 June 1999** ,2000 **Action plan for seabirds in Western-Nordic areas** Nordic Council of Ministers,Nordiska Ministerrådet,2010 Priority actions that will help counteracting the declining trends in seabird populations in Western Nordic areas including Scotland are presented in the report Action plan for seabirds in Western Nordic areas Report from an international workshop 4 5 May 2010 The background for the workshop was a resolution adopted at a joint meeting of Nordic nature conservation organizations in 2006 urging the Nordic Council of Ministers for the Environment to take coherent and strong measures in order to identify the causes for seabird populations decline and breeding failures and to propose mitigating actions More than 30 representatives from the sectors of fisheries environment energy science and hunter organizations took part in the workshop The action plan points out mitigating measures targeted impact factors identified in each sector The reports review of seabird status trends and anthropogenic impacts is a recommended source of updated information to be used when mitigating actions are planned The seabird action plan will be communicated to the Nordic Council of Ministers for the Environment to discuss and decide on cross national coordination and cooperation to address specific challenges national implementation in each country priority actions specifically assigned to the Nordic Council of Ministers for the Environment
