demonstrates how a mutual desire to heal and to be healed from trauma draws patients and analysts into their analytic relationships She recommends the reconceptualization of what has heretofore been considered transference and countertransference in terms of the transformation of experienced uncertainty In her view the increased ability of both analytic partners to live with uncertainty is the mark of a successful treatment Dr Brothers perspective sheds fresh light on a variety of topics of great general interest to analysts as well as many of their patients such as gender the acceptance of death faith cult like training programs and burnout Her discussions of these topics are enlivened by references to contemporary cinema and theatre
