and Place-Nomenclature of the Atlantic Coast of Canada William F. Ganong,1964-12-15 The Transactions of the Royal Society
of Canada for the years from 1929 to 1937 included a series in nine parts of important papers on Crucial Maps which have
been a frequent source of reference ever since for students of the history of discovery and of early cartography Their author
William Francis Ganong had a life long interest in the natural and human history of his native province New Brunswick
Although he was primarily a botanist with four full length books and an amazing number of articles to his credit it was
through his series of monographs in the Transactions of the Royal Society of Canada that the breadth of his interests became
known For over fifty years he contributed almost annually to the Transactions the results of his systematic investigations into
New Brunswick s physiography aborigines early explorations wars and settlements Crucial Maps which concluded in 1937
was the last series of articles Ganong was the first investigator to employ a critical classification of maps based upon
groupings by period and type although the cartography of Canada s east coast had earlier been introduced by Baron
Alexander von Humboldt Ganong s contributions to cartography are enormous for example his reconstruction of Cabot s
voyages while all may not agree with it is a masterpiece of inductive analysis which will remain a model in historical research
his chapters on Gomez Verrazzano and Fagundes are still the chief secondary sources on these discoverers There have been
notable additions to the bibliography of discovery and maps since Ganong wrote recently published works as well as the
complete file of Ganong s correspondence with his fellow cartographer G R F Prowse were consulted by Theodore E Layng
Map Division Public Archives of Canada in preparing the commentaries which accompany this edition of Crucial Maps These
commentaries with Mr Layng s introduction also provide an interesting sketch of Dr Ganong and his work Another important
feature of this edition is the index prepared by William Morley of the John Carter Brown Library In much of his work Ganong
was a pioneer and while subsequent studies have reached different conclusions on some points many of his results have
seldom been challenged Students of the present and future will still use and quote from Crucial Maps Royal Society of
