Secular Buildings In The Crusader Kingdom Of Jerusalem An Archaeological Gazetteer:

Secular Buildings in the Crusader Kingdom of Jerusalem Denys Pringle, 1997-12-11 A descriptive gazetteer of all the secular buildings known to have existed within the Crusader Kingdom of Jerusalem

The Conquest of the Holy Land by Salāḥ al-Dīn Keagan Brewer, James Kane, 2019-04-25 The *Libellus de expugnatione Terrae Sanctae per Saladinum* or Little Book about the Conquest of the Holy Land by al al D n is the most substantial contemporary Latin account of the conquest of the Kingdom of Jerusalem in 1187. Seemingly written by a churchman who was in Jerusalem itself when the city was besieged and captured, the *Libellus* fuses historical narrative and biblical exegesis in an attempt to recount and interpret the loss of the Holy Land, an event that provoked an outpouring of grief throughout western Christendom and sparked the Third Crusade. This book provides an English translation of the *Libellus* accompanied by a new comprehensive critical edition of the Latin text and a detailed study in the introduction.

Fortification and Settlement in Crusader Palestine Denys Pringle, 2023-06-14 These studies examine the physical remains of Frankish settlement in Palestine in the 12th and 13th centuries. In recent years, the view that Frankish settlement was largely confined to the fortified urban centres and castles, with few westerners venturing into the open countryside, has come to be challenged in the light of new archaeological evidence and re-examination of the sources. The present studies contribute to an understanding of the nature of Frankish settlement by illustrating aspects of the relationship between fortification and settlement, in particular the role of castles and towers in promoting settlement and providing both security and domestic accommodation; the relationship between castles, towers and other semi-fortified rural structures; the physical planning of the new towns established by the canons of the Holy Sepulchre; the measures undertaken to defend urban settlements; and the contribution that town walls and castles made to the security of the kingdom.

The Crusades and Visual Culture Laura J Whatley, 2017-07-05 The crusades, whether realized or merely planned, had a profound impact on medieval and early modern societies. Numerous scholars in the fields of history and literature have explored the influence of crusading ideas, values, aspirations and anxieties in both the Latin States and Europe. However, there have been few studies dedicated to investigating how the crusading movement influenced and was reflected in medieval visual cultures. Written by scholars from around the world working in the domains of art history and history, the essays in this volume examine the ways in which ideas of crusading were realized in a broad variety of media, including manuscripts, cartography, sculpture, mural paintings and metalwork. Arguing implicitly for recognition of the conceptual frameworks of crusades that transcend traditional disciplinary boundaries, the volume explores the pervasive influence and diverse expression of the crusading movement from the twelfth through the fifteenth centuries.

Medieval Warfare 1000-1300 John France, 2017-05-15 The study of medieval warfare has developed enormously in recent years. The figure of the armoured mounted knight, who was believed to have materialized in Carolingian times, long dominated all discussion of the subject. It is now understood that the knight emerged over a long period of time and that he was never alone on the field.

of conflict Infantry at all times played a substantial role in conflict and the notion that they were in some way invented only in the fourteenth century is no longer sustainable Moreover modern writers have examined campaigns which for long seemed pointless because they did not lead to spectacular events like battles As a result we now understand the pattern of medieval war which often did not depend on battle but on exerting pressure on the opponent by economic warfare This pattern was intensified by the existence of castles and careful study has revealed much about their development and the evolving means of attacking them Crusading warfare pitted westerners against a novel style of war and affords an opportunity to assess the military effectiveness of European methods New areas of study are now developing The logistics of medieval armies was always badly neglected while until very recently there was a silence on the victims of war Assembled in this volume are 31 papers which represent milestones in the development of the new ideas about medieval warfare set in context by an introductory essay

The Crusader States and their Neighbours Nicholas Morton, 2020-04-24 The Crusader States and their Neighbours Winner The Verbruggen Prize The Society for Medieval Military History explores the military history of the Medieval Near East piecing together the fault lines of conflict which entangled this much contested region This was an area where ethnic religious dynastic and commercial interests collided and the causes of war could be numerous Conflicts persisted for decades and were fought out between many groups including Kurds Turks Armenians Arabs and the crusaders themselves Nicholas Morton recreates this world exploring how each faction sought to advance its own interests by any means possible adapting its warcraft to better respond to the threats posed by their rivals Strategies and tactics employed by the pastoral societies of the Central Asian Steppe were pitted against the armies of the agricultural societies of Western Christendom Byzantium and the Islamic World galvanising commanders to adapt their practices in response to their foes Today we are generally encouraged to think of this era as a time of religious conflict and yet this vastly over simplifies a complex region where violence could take place for many reasons and peoples of different faiths could easily find themselves fighting side by side

Western Warfare In The Age Of The Crusades, 1000-1300 John France, 2020-09-16 In 1095 the First Crusade was launched establishing a great military endeavour which was a central preoccupation of Europeans until the end of the thirteenth century In Western warfare in the age of the Crusades 1000 1300 John France offers a wide ranging and challenging survey of war and warfare and its place in the development of European Society culture and economy in the period of the Crusades Placing the crusades in a wider context this book brings together the wealth of recent scholarly research on such issues as knighthood siege warfare chivalry and fortifications into an accessible form Western warfare in the age of the Crusades 1000 1300 examines the nature of war in the period 1000 1300 and argues that it was primarily shaped by the people who conducted war the landowners John France illuminates the role of property concerns in producing the characteristic instruments of war the castle and the knight This authoritative study details the way in which war was fought and the reasons for it as well as reflecting on the society which produced the crusades

The Southern

Transjordan Edomite Plateau and the Dead Sea Rift Valley Burton MacDonald, 2015-03-12 Burton MacDonald presents an in depth study of the archaeology and history of human presence over the past five six thousand years in the southern segment of the Transjordan Edomite Plateau and the Dead Sea Rift Valley to the west The evidence from archaeology for the area spans the entire period though the time for which literary evidence is available is only the past 4000 years from the Middle Bronze Age 2000 1550 BC Once literary evidence is available however it complements the archaeological record and as can be amply demonstrated the written records can be clarified only through the archaeological data These two sources are thus used to describe environments resources industries settlement patterns and the lifestyles of the inhabitants of this pivotal region The result is a story of the people who lived in the area from the Bronze Age through the Islamic period What is evident is that there were differences in certain archaeological periods in settlement patterns as well as lifestyles between those who lived on the southern segment of the Plateau and those who lived in the Dead Sea Rift Valley or in the lowlands immediately to the west Moreover it is obvious that when there were periods of trade and industry for example the spice trade and copper mining and processing the population of the area was higher Stable governance brought about growth in population and prosperity But other factors also played their part in these ebbs and flows of population climatic fluctuations affecting the availability of water and arable land the development and adoption of new technologies in farming practices raw material extraction and industrial methods processes and transportation and political change resulting in periods of relative stability and instability in government **The Templars** Jochen Burgdorf, Shlomo Lotan, Enric

Mallorquí-Ruscalleda, 2021-04-14 As the oldest of the military religious orders and the one with an unexpected and dramatic downfall the knighthood of the Templars continues to fascinate academics and students as well as the public at large A collection of fifteen chapters accompanied by a historical introduction The Templars The Rise Fall and Legacy of a Military Religious Order recounts and analyzes this community's rise and establishment in both the crusader states of the eastern Mediterranean and the countries of western Europe during the twelfth and thirteenth centuries reflects on the proceedings launched against it and its subsequent fall 1307 1314 and explores its medieval and post medieval legacy including an assessment of current research pertaining to the Templars and suggestions for future explorations Showcasing a wide range of methodological approaches and primary source materials this volume unites historical art historical theological archaeological and historiographical perspectives and it features the work and voices of scholars from various academic generations who reside in eight different countries Israel France Italy Spain the United Kingdom Germany Poland and the United States of America **Eastern Medieval Architecture** Robert G. Ousterhout, 2019-08-26 Aside from Hagia Sophia the monuments of the Byzantine East are poorly understood today This is in sharp contrast to the well known architectural marvels of Western Europe's Middle Ages In this landmark survey distinguished art historian Robert Ousterhout introduces readers to the rich and diverse architectural traditions of the medieval Eastern Mediterranean The focus of the book is the

Byzantine or East Roman Empire 324 1453 CE with its capital in Constantinople although the framework expands chronologically to include the foundations of Christian architecture in Late Antiquity and the legacy of Byzantine culture after the fall of Constantinople in 1453 Geographically broad as well this study includes architectural developments in areas of Italy the Caucasus the Near East the Balkans and Russia as well as related developments in early Islamic architecture Alternating chapters that address chronological or regionally based developments with thematic studies that focus on the larger cultural concerns the book presents the architectural developments in a way that makes them accessible interesting and intellectually stimulating In doing so it also explains why medieval architecture in the East followed such a different trajectory from that of the West Lavishly illustrated with hundreds of color photographs maps and line drawings Eastern Medieval Architecture will establish Byzantine traditions to be as significant and admirable as those more familiar examples in Western Europe and serve as an invaluable resource for anyone interested in architectural history Byzantium and the Middle Ages
