Security Without Nuclear Weapons Different Perspectives On Non Nuclear Security:

Security Without Nuclear Weapons? Stockholm International Peace Research Institute, 1992 This book examines the question Is the elimination of nuclear weapons feasible Individual chapters address the major conceptual technical and economic issues in the design of a non nuclear security regime Other chapters explore more specialized issues as they relate to the feasibility of the elimination of nuclear weapons elite perceptions and the decision making process verification nuclear proliferation fissile materials and warheads alliance and regional hegemonies and deterrence **Stable Nuclear Zero**

Sverre Lodgaard, 2016-08-12 This volume examines the conditions necessary for a stable nuclear weapons free world and the implications for nuclear disarmament policy The Nuclear Non Proliferation Treaty NPT is a road map to nuclear zero but it is a rudimentary one and it says nothing about the kind of zero to aim for Preferably this would be a world where the inhibitions against reversal are strong enough to make it stably non nuclear What then are the requirements of stable zero The literature on nuclear disarmament has paid little attention to this question By and large the focus has been on the next steps and discussions tend to stop where the NPT stops with the elimination of the weapons This book seeks to fill a lacuna by examining the requirements of stable zero and their implications for the road map to that goal starting from the vision to the present day The volume highlights that a clear conception of the goal not only is important in itself but can shed light on what kind of disarmament process to promote This book will be of much interest to students of nuclear proliferation global governance security studies and IR **Routledge Handbook of Nuclear Proliferation and Policy** Joseph Pilat, Nathan

Busch, 2015-05-15 This new Handbook is a comprehensive examination of the rich and complex issues of nuclear proliferation in the early 21st century The future of the decades long effort to prevent the further spread of weapons of mass destruction is at a crossroads today If international nonproliferation efforts are to be successful an integrated multi tiered response will almost certainly be necessary A serious thorough and clear eyed examination of the range of threats challenges and opportunities facing the international community is a necessary first step This Handbook which presents the most up to date analysis and policy recommendations on these critical issues by recognized leading scholars in the field intends to provide such an examination The volume is divided into three major parts Part I presents detailed threat assessments of proliferation risks across the globe including specific regions and countries Part II explains the various tools developed by the international community to address these proliferation threats Part III addresses the proliferation risks and political challenges arising from nuclear energy production including potential proliferation by aspiring states and nonstate groups This Handbook will be of great interest to students and practitioners of nuclear proliferation arms control global governance diplomacy and global security and IR general **Concepts of Non-Provocative Defence** G. Wiseman, 2001-12-18 This book

examines the viability of non provocative defence the controversial idea that defensive military policies and practices reduce the risk of wars and provide a viable basis for defending a society should war break out Drawing on case studies from Europe

the 1991 Persian Gulf War and Asia Pacific the author concludes that non provocative defence concepts remain relevant and that they can help in deterring conducting and settling wars The National Security of Small States in a Changing World Efraim Inbar,Gabriel Sheffer,2013-09-13 The first part of this book is primarily devoted to analysing the impact of the system of international relations on the fortunes of small states The second part discusses the question what changes in the national strategy of small states are necessary in view of the new international system The authors of this volume come from various parts of the world and espouse differing outlooks Nevertheless they were able to coalesce around a similar theme in an effort to contribute to the international understanding of the special challenges that confront the world s small states

Cultivating Confidence Corey Hinderstein,2013-09-01 Ten expert contributors present a blueprint for actions future government leaders will need to guide policy making to reduce nuclear dangers The authors identify the key technical political and diplomatic challenges associated with verifying monitoring and enforcing a world free of nuclear weapons and provide potential solutions to those challenges **The Treaty Prohibiting Nuclear Weapons** Alexander Kmentt,2021-05-17 This book chronicles the genesis of the negotiations that led to the Treaty on the Prohibition of Nuclear Weapons TPNW which challenged the established nuclear order The work provides readers with an authoritative account of the complex evolution of the Humanitarian Initiative HI and the negotiation history of the TPNW It includes a close analysis of internal strategy documents and communications in the author s possession which trace the tactical and political decisions of a small group of state actors By demonstrating the unacceptable humanitarian consequences and uncontrollable risks that these weapons pose to everyone s security the HI convinced many states to ban nuclear weapons and reject the policy of nuclear deterrence as unsustainable and illegitimate As such this book is a case study of multilateral diplomacy and cooperation between state and civil society actors It also contains a full discussion of both sides of the nuclear argument and assesses the extent to which the HI and the TPNW have moved the dial and present opportunities for transformational change This book will be of much interest to students of nuclear disarmament arms control and non proliferation diplomacy global governance and International Relations in general **Abolishing Nuclear Weapons** George Perkovich,2017-10-03 Nuclear disarmament is firmly back on the international agenda But almost all current thinking on the subject is focused on the process of reducing the number of weapons from thousands to hundreds This rigorous analysis examines the challenges that exist to abolishing nuclear weapons completely and suggests what can be done now to start overcoming them The paper argues that the difficulties of getting to zero must not preclude many steps being taken in that direction It thus begins by examining steps that nuclear armed states could take in cooperation with others to move towards a world in which the task of prohibiting nuclear weapons could be realistically envisaged The remainder of the paper focuses on the more distant prospect of prohibiting nuclear weapons beginning with the challenge of verifying the transition from low numbers to zero It moves on to examine how the civilian nuclear industry could be managed in a nuclear weapons free world so as to prevent

rearmament The paper then considers what political security conditions would be required to make a nuclear weapons ban enforceable and explores how enforcement might work in practice Finally it addresses the latent capability to produce nuclear weapons that would inevitably exist after abolition and asks whether this is a barrier to disarmament or whether it can be managed to meet the security needs of a world newly free of the bomb **United States Congressional Serial Set, Serial No. 14741, Senate Documents Nos. 15-17 , International Law Reports** E. Lauterpacht,C. J. Greenwood,1998-11-26 Includes International Court of Justice Advisory Opinions on use of nuclear weapons
