edition deals with psychological psychiatric and psychosocial issues that affect people who live and work in space Unlike other books that focus on anecdotal reports and ground based simulation studies this book emphasizes the findings from psychological research conducted during actual space missions Both authors have been active in such research *List of U.S. Army Research Institute Research and Technical Publications* U.S. Army Research Institute for the Behavioral and Social Sciences,2007

The Last of NASA's Original Pilot Astronauts David J. Shayler,Colin Burgess,2017-06-19 Resulting from the authors deep research into these two pre Shuttle astronaut groups many intriguing and untold stories behind the selection process are revealed in the book The often extraordinary backgrounds and personal ambitions of these skilled pilots chosen to continue NASA s exploration and knowledge of the space frontier are also examined In April 1966 NASA selected 19 pilot astronauts whose training was specifically targeted to the Apollo lunar landing missions and the Earth orbiting Skylab space station Three years later following the sudden cancellation of the USAF s highly classified Manned Orbiting Laboratory MOL project seven military astronauts were also co opted into NASA s space program This book represents the final chapter by the authors in the story of American astronaut selections prior to the era of the Space Shuttle Through personal interviews and original NASA documentation readers will also gain a true insight into a remarkable age of space travel as it unfolded in the late 1960s and the men who flew those historic missions *Selecting the Mercury Seven* Colin Burgess,2011-08-17 The names of the seven Mercury astronauts were announced in April 1959 amid a flurry of publicity and patriotism This work provides biographical details of all thirty two finalists for the seven coveted places as America s pioneering astronauts All of the candidates were among the nation s elite pilots involved in testing new supersonic aircraft capabilities Most had served as wartime fighter and bomber pilots some were test pilots on top secret and sophisticated aviation projects while others were fleet admirals prisoners of war and proposed pilots for spaceflight programs such as the Dyna Soar X 20 The names of all 32 finalists have been kept secret until very recently *Selecting the Mercury Seven* also relates the history and difficulties behind the initial choice of candidates The lives motivations military careers and achievements of the unsuccessful twenty five finalists are explored first in fully authorized biographies Test pilots for the U S Navy Air Force and Marine Corps each man has a fascinating and very different story to tell All thirty two men had to endure meticulous demeaning and brutal week long medical examinations at the Lovelace Clinic in New Mexico This was followed by another torturous week at the Wright Aeromedical Laboratory in Ohio where they were subjected to extreme fitness and physiological testing the sole purpose of which was to sort out the Supermen from the near supermen The final part of the book examines the accomplishments and spaceflights of the seven successful candidates bringing their amazing stories right up to date

Behavioral Health and Human Interactions in Space Nick Kanas,2023-02-02 This textbook covers the range of psychological and interpersonal issues that can affect astronauts living and working in space It deals with the three major risk areas cited by NASA s Behavioral Health and Performance Element Behavioral Medicine Team Risk and Sleep Risk

Based on the author's more than 50 years of experience in space related activities writing conducting research and teaching undergraduate and graduate courses the book follows a comprehensive range of topics that include cognitive effects psychiatric issues cultural influences salutogenic and positive aspects of space travel autonomy and delayed communication current plans to return to the Moon and Mars analysis of study environments such as the polar regions submersible habitats and space simulation facilities and more It draws on research literature and case studies from the 1950s onward showing readers in a natural and accessible way how the field has progressed over time The book contains ample end of chapter summaries and exercises as well as a complete glossary of key terms As such it will serve students taking courses in aerospace psychology psychiatry sociology human factors medicine and related social sciences in addition to space industry professionals and others interested in the complexities of people living and working in space
