Analogical City Cameron McEwan, 2024-01-18 In *Analogical City* Cameron McEwan argues for architecture's status as a critical project. McEwan revisits architect Aldo Rossi as a paradigmatic figure of the critical rational tradition, studying a neglected aspect of his thought: the analogical city. To excavate its potential, McEwan develops a grammar of the analogical city under the headings of Imagination, Transformation, City, Multitude, and Project. McEwan argues that the analogical city is critical, collective, and emancipatory. Analogical thought and understanding cities as analogical might open the conditions of possibility for rethinking the critical project in architecture. At a time when the humanities and the sciences are threatened by irrational thought from climate denial to post-truth narratives, and when architecture has seemingly disavowed its critical capacity and political possibility through its commodification as an instrument of the neoliberal city, McEwan offers critical strategies, conceptual tools, figures of thought, and knowledge practices to articulate modes of thinking and acting differently within architectural criticism and practice. Today, knowledge is a common terrain of struggle, and thought requires constant reinvention. The task of architecture and critique more broadly must be to interpret the world in order to change it. Consequently, *Analogical City* proposes modes for imagining the city, the subject, and the world otherwise, towards a more egalitarian and critical architecture of the city. Ultimately, the analogical city is not a fully developed theory, nor is it only an intuitive, poetic, or purely formal practice, as some critics propose. McEwan argues that the analogical city is poetic and political; it always refers beyond itself towards a collective and critical project of the city, and yet it invites a series of formal, spatial, and graphic operations comprising erasure and negativity, followed by substitution and remontage.

Rem Koolhaas/OMA Roberto Gargiani, 2008-01-01 *Projekter og bygninger af den hollandske arkitekt Rem Koolhaas og de øvrige medlemmer af OMA gennemgås i kronologisk orden* **House and Site** Eleonora Mantese, 2014 **Building Institution** Kim Förster, 2024-02-21 *Building Institution* chronicles the expansion of architecture as a profession and discipline in the postmodern era. Kim Förster traces the compelling history of the Institute for Architecture and Urban Studies, which was active in New York from 1967 to 1985. Drawing on extensive archival research and oral histories, he constructs a collective biography that details the Institute's diverse roles and the dynamic interplay between research and design, education, culture, and publishing. By exploring the transformation of cultural production into a practice, as well as the culturalization and global postmodernization of architecture, the volume contributes significantly to the institutional history of architecture. **Unorthodox Ways to Think the City** Teresa Stoppani, 2018-12-07 This book argues that architecture and the city and their processes can be better understood by drawing categories from disciplines that exceed the architectural

and urban cultural context It performs an open intellectual reading that traverses architecture and architectural theory but also art theory and history cartography philosophy literature and cultural studies to unfold a series of figures that are ambiguously placed between the representation and the construction of space in architecture and the city The paradigm and philosophy the island and the city the map and representation the model and making and the questioning of form performed by dust are explored beyond their definition as processes that differently make space between architecture and the city and are proposed as unorthodox analytic techniques to decipher contemporary spatial complexity The book analyses how these figures have been employed at different times and in different creative disciplines beyond architecture and in relation to changing notions of space and traces the role that they have played in the shift towards the dynamic that has taken place in contemporary theory and design research What emerges is the idea of an architecture of the city that is not only physical but is largely defined by the way in which its physical spaces are regulated lived and perceived but also imagined and projected

Beauregard,2015-11-06 Today urban scholars think of cities and regions as evolving through networks of human associations technologies and natural ecologies This being the case planners are faced with the task of navigating a profoundly material world Planning with and for humans alone is unacceptable in the unfolding of urban processes non human things cannot be ignored This inclusive vision has consequences for how planners envision the connections among norms technologies and life worlds as well as how they design and implement their plans The contributors to this volume utilize a variety of examples ecologically sensitive regional planning in Naples Italy congestion pricing in New York City and public participation in Europe among others to explore how planners engage a heterogeneous and restless world Inspired by assemblage thinking and actor network theory each chapter draws on this new materialism to acknowledge in quite pragmatic ways that spatial politics is a process of becoming that is inseparable from the materiality of urban practices Urban Transformations and the Architecture of Additions Rodrigo Perez de Arce,2014-08-07 Rodrigo Perez de Arce s essay Urban Transformations and Architectural Additions was published during the formative stages of Post Modernism at the point where theory was becoming seriously established Jencks first essays formalising the term Post Modernism in architecture and the revised Learning from Las Vegas were published the previous year In planning terms modernism had become associated with comprehensive redevelopment and forms of urban organisation that ignored context history and any sense of tradition De Arce considered the essential nature of buildings and the richness of historic urban form and explored how robust that essence was over time He looked at the value of essential remnants and rich complexities in maintaining a sense of continuity and relevance Having explored the adaptation process in

history de Arce went on to see how such a process might be simulated in contemporary cities with modern buildings using additions and layers to change them from objects in infinite windswept space to being part of a rich urban fabric which described urban place To do this he used concrete examples housing schemes by James Stirling new government centres in Chandigarh and Dacca and more prosaic 60 s housing blocks The paper had a fundamental influence on the way that architects and planners thought about the nature of cities as dynamic organisms that were tangible to human beings completely opposite to the systems thinking of the time It contributed to ideas about the importance of street place and city block which influenced so much recent regeneration practice As we enter a phase of development where the reuse and adaptation of existing buildings is becoming paramount from both an economic and sustainable point of view Perez de Arce s paper gives important insights into how to think about the process positively

The Architecture of Modern Italy Terry Kirk,2005-06-02 Modern Italy may sound like an oxymoron For Western civilization Italian culture represents the classical past and the continuity of canonical tradition while modernity is understood in contrary terms of rupture and rapid innovation Charting the evolution of a culture renowned for its historical past into the 10 modern era challenges our understanding of both the resilience of tradition and the elasticity of modernity We have a tendency when

imagining Italy to look to a rather distant and definitely premodern setting The ancient forum medieval cloisters baroque piazzas and papal palaces constitute our ideal itinerary of Italian civilization The Campo of Siena Saint Peter s all of Venice and San Gimignano satisfy us with their seemingly unbroken panoramas onto historical moments untouched by time but elsewhere modern intrusions alter and obstruct the view to the landscapes of our expectations As seasonal tourist or seasoned historian we edit the encroachments time and change have wrought on our image of Italy The learning of history is always a complex task one that in the Italian environment is complicated by the changes wrought everywhere over the past 250 years Culture on the peninsula continues to evolve with characteristic vibrancy Italy is not a museum To think of it as such as a disorganized yet phenomenally rich museum unchanging in its exhibits is to misunderstand the nature of the Italian cultural condition and the writing of history itself
