

Sexual Orientation

The Biological Component:

⌘ Evolutionary considerations:

Premise 1: Sexual desire and romantic love are functionally independent

Premise 2: Romantic love is not intrinsically oriented to same-gender or other-gender partners.

Premise 3: The links between love and desire are bidirectional.

⌘ Heritability estimates account for only about 50% of same-sex orientation. (Twin studies)

⊞ Seem through twin studies.

⊞ Other hormonal effects on human sexuality are difficult to assess because studies are dependent on “experiment of nature” to determine effects.

The Castration of Oedipus Joseph C. Smith, Carla J. Ferstman, 1996-03 The intellectual movements of psychoanalysis postmodernism and feminism have redefined the ways in which we think about human experience And yet an integration of these movements has been elusive if not impossible In this landmark book J C Smith and Carla J Ferstman combine these disparate traditions to create a provocative unified and tightly woven perspective that transcends the misogyny implicit in much of Freudian psychoanalytic theory The dialectics of domination and submission are central to Smith and Ferstman s argument Men and women they insist must avoid the temptation to fetishize equality and recognize the roles of domination and submission in the human psyche or in Nietzsche s terms the Will to Power They argue that the unification of psychoanalysis postmodernism and feminism leads us to a shocking conclusion that women and men cannot move beyond the suffering which so haunts the human condition unless heterosexual men surrender the power that is causing their misery and affirm life by joyfully accepting domination by women And women conversely must reaffirm their

power by rejecting Oedipal genderization and embracing a liberating matriarchal consciousness and a matriphallic sexuality
A work of tremendous insight and extraordinary intellectual energy The Castration of Oedipus will provoke strong reactions
in all readers regardless of ideology
