associated with addiction and the large illicit traffic in drugs He interviews approximately fifty addicts over a fairly extended period of time sufficient to establish an informal friendly relationship of mutual trust The attempt to account for the differential reactions among drug users requires specification of the circumstances under which physical dependence results in addiction and in the absence of which it does not It also requires careful consideration of the meaning of addiction spelled out in terms of behavior and attitudes characteristic of opiate addicts everywhere This book strives to understand these aspects of addiction with the ultimate goal of understanding the factors which create its foundations Alfred R Lindesmith 1905 1991 was professor of sociology at Indiana University and was one of the first scholars to provide a well researched account on the subject of addiction He believed that opiate addiction was based on dramatic shifts of an individual s mental and motivation states
