Haught, 2010-02-16 Evolution makes good scientific sense The question is whether it makes good theological sense as well Christians who find evolution contrary to faith often do so because they focus solely on the issues of the world s design and the notion of the gradual descent of all life from a common ancestry But that point of view overlooks the significance of the dramatic narrative going on beneath the surface What evolution is has become more important than what it means Haught suggests that rather than necessarily contradicting one another theologians and Darwinian scientists actually share an appreciation of the underlying meaning and awe inspiring mystery of evolution He argues for a focus on evolution as an ongoing drama and suggests that we simply cannot indeed need not make complete sense of it until it has fully played out Ultimately when situated carefully within a biblical vision of the world as open to a God who makes all things new evolution makes sense scientifically and theologically **Making Sense** Bill Cope, Mary Kalantzis, 2020-01-30 Explains the multimodal connections of text image space body sound and speech in both old and new computer mediated communication systems *Making Sense of Grammar* John Clark Jordan, 1980-01-01 **Making Sense** David R. Olson, 2022-05-05 This account of children s learning to ascribe understanding to themselves and others may help to explain children s theory of mind **The First Book of the Rational System of English Grammar ...** James Brown (Grammarians), 1854 *Making Sense of the Learning Turn* Anders Örtengren, 2024-05-09 From learning toy and learning society to learning city and learning organization what is meant by learning The main focus of this volume is to increase our understanding of the learning turn referring in this book to the frequent occurrence and usage of terms in the last few decades where the word learning is the premodifier The authors also offer insights into the use of the word learning as a premodifier in the future and discuss what if anything may replace it such as knowledge as in knowledge management and smart as in smart city An extensive range of academic disciplines are covered including political science economics human geography philosophy linguistics higher education working life science management and organization and marketing While a single overall unified conclusion is not provided Making Sense of the Learning Turn presents a variety of voices and perspectives Some contributors are critical towards the learning turn explaining it in terms of fashion following manipulation and seduction Others interpret the learning turn more lightly or suggest a more collective form of learning as an alternative to the individualization of learning that some authors argue has

been the case thus far Making Sense English Grammar Jake Allsop, **Wittgenstein: Rules, Grammar and Necessity** Gordon P. Baker, P. M. S. Hacker, 2014-02-03 The Second Edition of Wittgenstein Rules Grammar and Necessity the second volume of the landmark analytical commentary on Wittgenstein's Philosophical Investigations now includes extensively revised and supplemented coverage of the Wittgenstein's complex and controversial remarks on following rules Includes thoroughly rewritten essays and the addition of one new essay on communitarian and individualist conceptions of rule following Includes a greatly expanded essay on Wittgenstein's conception of logical mathematical and metaphysical necessity Features updates to the textual exegesis as the result of taking advantage of the search engine for the Bergen edition of the Nachlass Reflects the results of scholarly debates on rule following that have raged over the past 20 years **Making Sense of English Grammar** Jake Allsop, 1993 **Metaphysics and Grammar** William Charlton, 2014-03-13 Metaphysics deals with truth existence and goodness it also considers change time and causation which characterise the physical world and thought and language We are familiar with all these things but when we try to say what they are we become tongue tied William Charlton draws a line between lexicography which lists words and grammar which specifies constructions for various forms of speech Both words and constructions have meaning but in different ways and he argues that the topics of metaphysics are expressed primarily by constructions He surveys the history of philosophy from classical Greece to the present day he shows how metaphysics and grammar grew up in tandem and he connects the difficulties philosophers have encountered especially since the Enlightenment with a failure to grasp the significance for metaphysics of grammar as distinct from lexicography Metaphysics and Grammar presents metaphysics as an art not a science It takes the traditional topics in turn it brings out the relation between each of them and a form of speech and it argues that these forms of speech provide us with our only reliable access to our nature as conscious beings acting in a physical world **The Accidence and Principles of English Grammar** Benjamin Humphrey Smart, 1841 Making Sense of Narrative Text Michael Toolan, 2016-06-03 This book takes the following question as its starting point What are some of the crucial things the reader must do in order to make sense of a literary narrative The book is a study of the texture of narrative fiction using stylistics corpus linguistic principles especially Hoey's work on lexical patterning narratological ideas and cognitive stylistic work by Werth Emmott and others Michael Toolan explores the textual grammatical nature of fictional narratives critically re-examining foundational ideas about the role of lexical patterning in narrative texts and also engages the cognitive or psychological processes at play in literary reading The study grows out of the theoretical questions that stylistic analyses of extended fictional texts raise concerning the nature of narrative comprehension and the reader's experience in the course of reading narratives and particularly concerning the role of language in that comprehension and experience The ideas of situation repetition and picturing are all central to the book's argument about how readers process story and Toolan also considers the ethical and emotional involvement of the reader developing hypotheses about the text linguistic characteristics

of the most ethically and emotionally involving portions of the stories examined This book makes an important contribution to the study of narrative text and is in dialogue with recent work in corpus stylistics cognitive stylistics and literary text and texture
