Mecanismo y elementos del sistema económica colonial americano, siglos XVI-XVIII Ruggiero Romano, 2004 Culminación de una obra histórica desarrollada a lo largo de medio siglo Mecanismo y elementos del sistema económico colonial americano muestra las fuerzas que favorecieron y obstaculizaron el desarrollo económico del mundo americano en el periodo colonial el autor presenta una visión histórica de conjunto inexistente hasta ahora

American Globalization, 1492-1850 Bartolomé Yun-Casalilla, Ilaria Berti, Omar Svriz-Wucherer, 2021-06-28 Following a study on the world flows of American products during early globalization here the authors examine the reverse process By analyzing the imperial political economy the introduction adaptation and rejection of new food products in America as well as of other European Asian and African goods American Globalization 1492 1850 addresses the history of consumerism and material culture in the New World while also considering the perspective of the history of ecological globalization This book shows how these changes triggered the formation of mixed imagined communities as well as of local and regional markets that gradually became part of a global economy But it also highlights how these forces produced a multifaceted landscape full of contrasts and recognizes the plurality of the actors involved in cultural transfers in which trade persuasion and violence were entwined The result is a model of the rise of consumerism that is very different from the ones normally used to understand the European cases as well as a more nuanced vision of the effects of ecological imperialism which was moreover the base for the development of unsustainable capitalism still present today in Latin America Chapters 1 3 4 7 8 11 and 13 of this book are freely available as a downloadable Open Access PDF under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license available at <http://www.taylorfrancis.com>

A Colonial Book Market Agnes Gehbald, 2023-11-30 This volume provides a wholly original social history of books in late colonial Peru From the second half of the eighteenth century onward workshops in Lima and transoceanic imports supplied the market with unprecedented quantities of print publications By tracing the variety of printed commodities that were circulating in the urban sphere as well as analysing the spatiality of the trade and the materiality of the books themselves Agnes Gehbald assesses the meaning of print culture in the everyday lives of the viceroyalty She reveals how books permeated late colonial society on a broad scale and how they figured as objects in the inventories of diverse individuals both women and men who in previous centuries had been far less likely to possess them Deeply researched and profound A Colonial Book Market uncovers how people in Peruvian cities gained access to reading material and participated in the global Enlightenment project

Latin American Bureaucracy and the State Building Process (1780-1860) Juan Carlos Garavaglia, Juan Pro Ruiz, 2013-07-26 The process of construction of national states had a decisive moment during the period of revolutions that spanned from the end of the eighteenth century until the mid nineteenth century Even if it was a generalized process throughout the Western world the majority of social scientists that have analyzed it have based their theoretical models on the European and North American experiences This volume pays

particular attention to the historical experience of Latin America and accounts for its distinctive regional and national characteristics through the analysis of cases. It also evokes the existence of certain features of the process that historiography has not sufficiently taken into consideration until now. This book provides the first detailed perspective of the formation of the State's bureaucracies in Latin America, a long and complex process shaped by the political, economic, social, and cultural conditions of different countries in the continent. These bureaucracies absorbed and institutionalized the pre-existing configurations of power while simultaneously transforming them. The essays included in this book offer an innovative vantage point for the analysis of issues that continue to be crucial in present-day Latin America, such as those that involve the relations between the State and society. Historia mínima de la economía mexicana, 1519-2010 Sandra Kuntz Ficker, 2012. Obra accesible que pone de relieve aspectos del pasado que son de importancia e interés para el mundo de hoy. Ofrece una imagen fresca y desprejuiciada de nuestra historia económica que supera los estereotipos y las ideologías tan comunes en la cultura económica de nuestro país. Sus capítulos se entrelazan para proporcionar continuidad y fluidez al nuevo conjunto. El propósito es ofrecer una mirada general en una versión que resulta apropiada para lectores. Versión sintética del contenido de la Historia económica general de México. **Global Goods and the Spanish Empire, 1492-1824** B. Aram, B. Yun-Casalilla, 2014-11-18. Drawing upon economic history, cultural studies, intellectual history, and the history of science and medicine, this collection of case studies examines the transatlantic transfer and transformation of goods and ideas with particular emphasis on their reception in Europe. **Merchants and Trade Networks in the Atlantic and the Mediterranean, 1550-1800** Manuel Herrero Sánchez, Klemens Kaps, 2016-09-01. This collective volume explores the ways merchants managed to connect different spaces all over the globe in the early modern period by organizing the movement of goods, capital, information, and cultural objects between different commercial maritime systems in the Mediterranean and Atlantic basin. **Merchants and Trade Networks in the Atlantic and the Mediterranean, 1550-1800** consists of four thematic blocs: theoretical considerations, the social composition of networks, connected spaces, networks between formal and informal exchange, as well as possible failures of ties. This edited volume features eleven contributions that deal with theoretical concepts such as social network analysis, globalization, social capital, and trust. In addition, several chapters analyze the coexistence of mono-cultural and transnational networks, deal with network failure and shifting network geographies, and assess the impact of kinship for building up international networks between the Mediterranean and the Atlantic. This work evaluates the use of specific network types for building up connections across the Mediterranean and the Atlantic Basin, stretching out to Central Europe, the Northern Sea, and the Pacific. This book is of interest to those who study history of economics and maritime economics, as well as historians and scholars from other disciplines working on maritime shipping, port studies, migration, foreign mercantile communities, trade policies, and mercantilism. Iberian Empires and the Roots of Globalization Ivonne del Valle, Anna More, Rachel Sarah O'Toole, 2020-01-15 Through interdisciplinary essays covering the wide geography of the Spanish and Portuguese empires *Iberian Empires and the Roots of Globalization* investigates the diverse networks and multiple centers of early modern globalization that emerged in conjunction with Iberian imperialism *Iberian Empires and the Roots of Globalization* argues that Iberian empires cannot be viewed apart from early modern globalization From research sites throughout the early modern Spanish and Portuguese territories and from distinct disciplinary approaches the essays collected in this volume investigate the economic mechanisms administrative hierarchies and art forms that linked the early modern Americas Africa Asia and Europe *Iberian Empires and the Roots of Globalization* demonstrates that early globalization was structured through diverse networks and their mutual and conflictive interactions within overarching imperial projects To this end the essays explore how specific products texts and people bridged ideas and institutions to produce multiple centers within Iberian imperial geographies Taken as a whole the authors also argue that despite attempts to reproduce European models early Iberian globalization depended on indigenous agency and the agency of people of African descent which often undermined or changed these models The volume thus relays a nuanced theory of early modern globalization the essays outline the Iberian imperial models that provided templates for future global designs and simultaneously detail the negotiated and conflictive forms of local interactions that characterized that early globalization The essays here offer essential insights into historical continuities in regions colonized by Spanish and Portuguese monarchies

Álvarez, Jimena Hurtado, 2023-09-08 Ever since the quest for independence between 1810 and 1819 economic thought in Colombia has been shaped by policy debates and characterized by a pragmatic and eclectic approach Economic thought in Colombia can only be revealed through the exploration of economists practices and the role of economic arguments within broader public debate This history of Colombian economic thought provides a detailed account of major issues that have marked the constant feedback between economic ideas and economic practice in Colombia during the 19th and 20th centuries This volume is thus a history of the interaction between ideas and policy Those involved in these debates politicians public officials journalists and latterly professional economists established direct contact with what can be identified as the centers of production of economic theory both in Europe and the US and entered regional and local networks in economics but were not just importers of ideas or theories The way in which they read discussed transformed and applied economic theories in Colombia makes for a rich environment for the production and implementation of economic policies that drew diverged and transformed the way economics was understood and used as a source of knowledge for practical concerns This is why the history of Colombian economic thought does not fit into traditional typologies of economic schools and why it must be understood as part of a political debate and within a political social and cultural context that demanded specific solutions to urgent social demands Through the study of what was taught when and how at the beginnings of the republican era and why and how professional economists came to lead public debate and economic policy making in the 20th century this book explores the foundations of this permanent interaction between theory and practice This book will be of significant interest to readers of history of economic thought economic history and the history of Colombian and Latin American economic political and social life more broadly **Making a New World** John Tutino, 2011-08 This history of the political economy social relations and cultural debates that animated Spanish North America from 1500 until 1800 illuminates its centuries of
