**Moving Crucifixes in Modern Spain** William A. Christian, 2014-07-14 Why are religious visions believed only in certain times and places In this book William Christian investigates the settings and responses to a series of group visions reported by Spaniards in rural Galicia Valencia Cantabria and Navarre in the early part of this century the most notable one involving the crucifix at Limpas where Jesus was first seen agonizing on the cross during a mission service in March of 1919 In light of the social strife and strong anticlerical movements of the period the author examines how gender and religious politics influenced the experiences of seers and the interpretation of their visions by church officials journalists and the public Christian approaches the story inductively from the visionaries and the parish to the religious orders diocesan officials and Vatican envoys He places the events in the context of mission dramaturgy and pilgrimages to Lourdes and shows their ramifications in Italy Mexico the United States France and Central Europe Using oral testimony church archives local newspaper accounts and apologetic literature Christian finds that some observers related the moving crucifixes to a logical millenarian sequence that included earlier apparitions in France for others they were divine reactions to national political events while for many local people they were signs for the establishment of new shrines His study reveals the preoccupations of ordinary people and how they found expression in religious images Originally published in 1992 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

Pattison,2016-04-01 Faces are all around us and fundamentally shape both everyday experience and our understanding of people To lose face is to be alienated and experience shame to be enfaced is to enjoy the fullness of life In theology as in many other disciplines faces as both physical phenomena and symbols have not received the critical appreciative attention they deserve This pioneering book explores the nature of face and enfacement both human and divine Pattison discusses questions concerning what face is how important face is in human life and relationships and how we might understand face both as a physical phenomenon and as a series of socially inflected symbols and metaphors about the self and the body Examining what face means in terms of inclusion and exclusion in contemporary human society and how it is related to shame Pattison reveals what the experience of people who have difficulties with faces tell us about our society our understandings of and our reactions to face Exploring this ubiquitous yet ignored area of both contemporary human experience and of the Christian theological tradition Pattison explains how Christian theology understands face both human and divine and the insights might it offer to understanding face and enfacement Does God in any sense have a physically visible face What is the significance of having an enfaced or faceless God for Christian life and practice What does the vision of God mean now If we want to take face and defacing shame seriously and to get them properly into perspective we may need to change our theology thought and practice changing our ways of thinking about God and about theology **Before**

*Challenging Authority* Michael P. Hanagan,Leslie Page Moch,Wayne Ph Te Brake,1998 As long as there have been formal governments there has been political contention an interaction between ruler and subjects involving claims and counterclaims compliance or resistance cooperation resignation condescension and resentment Where political studies tend to focus on either those who rule or those who are ruled the essays in this volume call our attention to the interaction between these forces at the very heart of contentious politics Written by prominent scholars of political and social history these essays introduce us to a variety of political actors peasants and workers tax resisters and religious visionaries bandits and revolutionaries From Brazil to Beijing from the late Middle Ages to the present all were or are challenging authority The authors take a distinctly historical approach to their subject writing both of specific circumstances and of larger processes While tracing their origins to the social history and structural sociology approaches of the sixties and seventies the contributors have also profited from subsequent critiques of these approaches Taken together their essays demonstrate that the relationship between mobilization for collective action and identity formation is a perennial problem for protest groups a problem that the historical study of contentious politics with its focus on political interaction can do much to explain

*Governing Spirits* Reinaldo L. Román,2009-11-30 Freedom of religion did not come easily to Cuba

or Puerto Rico Only after the arrival of American troops during the Spanish American War were non Catholics permitted to practice their religions openly and to proselytize When government efforts to ensure freedom of worship began reformers on both islands rejoiced believing that an era of regeneration and modernization was upon them But as new laws went into effect critics voiced their dismay at the rise of popular religions Reinaldo L Roman explores the changing relationship between regulators and practitioners in neocolonial Cuba and Puerto Rico Spiritism Santeria and other African derived traditions were typically characterized in sensational fashion by the popular press as a plague of superstition Examining seven episodes between 1898 and the Cuban Revolution when the public demanded official actions against misbelief Roman finds that when outbreaks of superstition were debated matters of citizenship were usually at stake He links the circulation of spectacular charges of witchcraft and miracle making to anxieties surrounding newly expanded citizenries that included people of color Governing Spirits also contributes to the understanding of vernacular religions by moving beyond questions of national or traditional origins to illuminate how boundaries among hybrid practices evolved in a process of historical contingencies
