**Republic of Mozambique** International Monetary Fund, 2007-07-31 This paper discusses the Republic of Mozambique's 2007 Article IV Consultation and Sixth Review Under the Poverty Reduction and Growth Facility PRGF. The post conflict rebound has largely run its course and first generation reforms are completed; a second wave of reforms is needed to sustain broad based growth and further reduce poverty. Achieving the non income related Millennium Development Goals also requires scaling up basic services without undermining macroeconomic stability. The PRGF program helped maintain macroeconomic stability in the face of exogenous shocks and addressed the structural weaknesses identified in the Ex Post Assessment. *Commodity Trade Statistics*, 1995 **1968 Annual Supplement** John B. Statistics Dept., 2009-02-23 This evaluation of technical assistance (TA) in statistics covers two post conflict countries namely Mozambique and Rwanda during the period 2000-08. The TA including training covered the broad spectrum of the Statistics Department's STA program including collaboration with the East Africa Regional Technical Assistance Center (East AFRITAC), the U.K. Department for International Development (DFID) and the Japanese funded General Data Dissemination System (GDDS) projects as well as TA funded directly from the IMF's budget. The emerging lessons also provide a useful guide to future TA to non English speaking countries. The evaluation is based on missions to each country and relied on responses to questionnaires, desk reviews of available data and discussions with country authorities, donors, data users and national officials who participated in IMF courses in statistics. [The Next Generation of Scientists in Africa](#) Catherine Beaudry, Johann Mouton, 2018-11-23 Young scientists are a powerful resource for change and sustainable development as they drive innovation and knowledge creation. However, comparable findings on young scientists in various countries, especially in Africa and developing regions, are generally sparse. Therefore, empirical knowledge on the state of early career scientists is critical in order to address current challenges faced by those scientists in Africa. This book reports on the main findings of a three and a half year international project in order to assist its readers in better understanding the African research system in general and more specifically its young scientists. The first part of the book provides background on the state of science in Africa and bibliometric findings concerning Africa's scientific production and networks for the period 2005 to 2015. The second part of the book combines the findings of a large scale quantitative survey and more than 200 qualitative interviews to provide a detailed profile of young scientists and the barriers they face in terms of five aspects of their careers: research output, funding, mobility, collaboration and mentoring. In each case, field and gender differences are also taken into account. The last part of the book comprises conclusions and recommendations to relevant policy and decision makers on desirable changes to current research systems in Africa. **Constructing markets for agroecology** Food and Agriculture Organization of the United Nations, 2018-05-15 This study offers a unique approach to understanding how
