MR Imaging and Spectroscopy of Central Nervous System Infection Rakesh K. Gupta, Robert B. Lufkin, 2007-05-08 Central nervous system CNS infections continue to pose a serious problem in health care even with improved knowledge and treatment Despite the introduction of newer antimicrobial agents and diagnostic techniques the morbidity and mortality associated with CNS infections remain high The morbidity associated with CNS infections may be even more important than the death rate especially in developing countries as neurological sequelae may deprive the survivors of intellect and physical ability demeaning the quality of life and burdening health resources and social services MR imaging is an important integral part of the protocol for the management of CNS infections and MR spectroscopy is increasingly being utilized in its management This work is an attempt to provide a comprehensive review of imaging and spectroscopy of the commonly encountered CNS infections in the clinical practice in developing and developed countries The first chapter deals with basic physical principles of MR imaging and spectroscopy that will help beginners to understand the technical terms used in subsequent chapters The remaining 10 chapters deal with clinical pathological MR imaging and spectroscopy features and their applications in CNS infections This will help in giving a comprehensive understanding to readers with a background in clinical radiological basic MRI and neurological sciences The T2 hypointense lesions are a real diagnostic dilemma especially in developing countries for which an algorithm has been suggested in the concluding chapter

Tamraz, 2007-11-04 The idea of publishing a book came into my mind to the description of the imaging findings of parasitic diseases. When a few years ago I submitted a manuscript, I realized that only parasitic diseases are not confined only to the tropics. The Imaging of Parasitic Diseases of the Hepato biliary System for tropical and subtropical areas indeed they are increasing worldwide because of travel immunosuppression and radiology journals. The manuscript was rejected but an other behavioral and living deficiencies especially poor hygiene and sanitation. Some of these diseases are prevalent would be more suitable for publication as a chapter in a text or clustered in poor or developing countries but the book I took up the challenge and began the search for majority are encountered worldwide even in industrialized and developed countries. At this point I would like to thank the reviewer for giving me the opportunity. In the radiologic bibliography there is a shortage of the idea and throwing down the challenge books on the subject of Imaging of Infection. This book's aim of this book is to introduce the concept of is intended to partly rectify this shortfall and is aimed at Imaging of Infection which includes bacterial viral radiologists all over the world fungal and parasitic infections. *Spinal Imaging* Johan W.M. van Goethem, Luc van den Hauwe, Paul M. Parizel, 2007-12-27 In the Name of Love and Family This book could not have been completed without the continuing support of my wife Isabelle who as a radiologist herself not only understood my endeavor to complete this work but who was also my most loyal supporter. As the mother of our three daughters Alexia Olivia and Felicia she is also the cornerstone of our wonderful family and I wish to dedicate this book to these four women in my life.
