Robert K. Garcia, Nathan L. King, 2009 Morality and religion intimately wed violently opposed or something else Discussion of this issue appears in pop culture the academy and the media often generating radically opposed views At one end of the spectrum are those who think that unless God exists ethics is unfounded and the moral life is unmotivated At the other end are those who think that religious belief is unnecessary for and even a threat to ethical knowledge and the moral life This volume provides an accessible charitable discussion that represents a range of views along this spectrum The book begins with a lively debate between Paul Kurtz and William Lane Craig on the question Is goodness without God good enough Kurtz defends the affirmative position and Craig the negative Following the debate are new essays by prominent scholars These essays comment on the debate and advance the broader discussion of religion and morality The book closes with final responses from Kurtz and Craig *Royal Navy List*, 1913 **The Works of Elizabeth Gaskell, Part II vol 10** Joanne Shattock, Angus Easson, 2017-09-29 Features Elizabeth Gaskell's work This work brings together her journalism her shorter fiction which was published in various collections during her lifetime her early personal writing including a diary written between 1835 and 1838 when she was a young mother her five full length novels and *The Life of Charlotte Bronte* *The Archer's Register*, 1894 **Religion** Anthony Wallace, 2013-02-13 The classic anthropological analysis of religion from a pioneer in the field From the preface Scientific efforts to learn just what are the forms and functions of religion have not been few it is the purpose of this book to review some of them and to synthesize the suggestions and findings My own personal feeling is that sociological viewpoints including much of social anthropology tend to focus on the scaffolding and milieu of religion rather than on religion itself and that religion can be best understood from a combination of psychological and cultural points of view This book is not I think motivated by a need to destroy by dissection a way of thinking and acting that many educated people feel is of little use or is even disadvantageous in a world increasingly

committed to the search for scientific and technological solutions of human problems Rather I aim to preserve a friendly detachment in the asking of fundamental scientific questions about religion
