written for physicians urologists and health care providers and easier to read books written for the general public Only a smattering of the books on interstitial cystitis IC that are available today provide suggestions on how to implement daily life changes to help heal IC Most if not all stop short of a multi tiered approach and very few recognize the pivotal role of the patient or IC sufferer in the healing journey This book fills in the missing gaps To schedule individual self advocacy consults or to engage Dr Alexis professionally please visit www.drtracyalexis.com or email drtracyalexis@gmail.com **Aging**

Without Growing Old Judy Lindberg McFarland,Laura Gladys McFarland,2003 Most people today are aging too rapidly and are dying from illnesses that could be prevented Judy Lindberg McFarland wants to help readers prevent all the degenerative diseases and illnesses that accompany aging and the heartaches resulting from the loss of one s health In *Aging Without Growing Old* men and women of all ages will find out how to become healthy through natural and nutritional means They ll learn how to enjoy greater health no matter how old they are and how to slow the aging process down to a crawl It is possible to start defying your age with the essential information found in this book *Natural Forms of Defense Against Biological, Chemical and Nuclear Threats* John Brighton,2007-02-26 The events that took place on September 11th caused Dr John

Brighton a naturopathic health consultant to ask himself questions about what role natural forms of healing might have in a scenario involving weapons of mass destruction WMD As he examined the issues and the nature of the threat he felt assured that a naturalistic approach could make a significant contribution in conjunction with that offered by conventional medicine Moreover he felt that to use both would provide a more powerful deterrent than if either were used alone The naturalistic approach would augment the use of drugs by adding 5 extra lines of defense aimed at supporting and strengthening the immune system to deal with such a dire event These lines include A psychological dimension A social dimension A preventative dimension An environmental dimension A specific dimension The whole idea of this holistic strategy is to employ prevention and immune enhancing factors in order to reduce the level of crisis to begin with As a result the dependency on antibiotics there are no effective antivirals and other valuable medical resources can be considerably reduced and most importantly preserved for when they would be needed most Another benefit of integrating these two systems would add what Dr Brighton calls synergistic complexity as a way to reduce the current crisis of germ resistance to many most potent antibiotics and to provide a holistic approach to all forms of WMD The book clarifies the scope of the threat we face by examining The variety of biological chemical and nuclear threats The factors involved in the creation of WMD The uncanny capacity of microbes to develop resistance to our medications The threat of bioengineering and the creation of superbugs How synergistic complexity could provide a possible solution A chapter is dedicated to focusing on the specific nature and challenges posed by each biological chemical and nuclear agent This includes A description of the agent How it causes harm How it might be used as a weapon and the possibility of it being used How it is detected diagnostically and in the field The conventional method of care and treatment The suggested natural forms of defense including herbs vitamins minerals and other natural substances and healing therapies The book ends with a forward looking chapter on emerging technologies that have promise of increasing our level of defense against WMD A bibliography and a full section on resources are available
