

An Alternative Theory of Everything: Classical Quantum Physics

Summary

This paper recaps the main results of our photon, proton and electron models and also revisits our earlier hypothesis of the neutrino being the carrier of the strong force carrier. As such, we think this paper contains all necessary ingredients of an alternative interpretation of quantum mechanics. We refer to this interpretation as a *realist* or *classical* interpretation because it does not require any equations or assumptions beyond the classical framework of physics: Maxwell's equations and the Planck-Einstein relation are all that is needed. In order to distinguish our approach from mainstream physics (read: the Standard Model), we refer to our ideas as *classical quantum physics*.
