Ecologies of Artistic Practice Ashley Lee Wong, 2025-05-27 An in depth look at how we make and circulate art today and how creative and economic processes shape the meaning and value of artworks In Ecologies of Artistic Practice Ashley Lee Wong explores the economic relationships of artists working at the nexus of art and technology as they negotiate a means to make art in a neoliberal creative economy Wong looks at the diverse ways in which artworks circulate both online and offline in galleries on digital platforms and on

media facades and investigates some of the mechanisms that enable artists to create works including selling artworks and NFTs grants licensing commissions and artist residencies The book also looks at the ways in which artists collaborate with corporations and develop practices as commercial entities themselves The book provides unique insights into the diverse creative and economic processes that shape the meaning and value of artworks Wong seeks to shift away from notions of individual authorship and finite artworks that can be bought and sold and instead toward an understanding of artistic practices as collaborative social and cultural processes Rather than critique this economy *Ecologies of Artistic Practice* opens space for engaging in hypercommercialized contexts while considering how money is not an end goal but a means to initiate or continue an artistic process

Society and Technology Marisa Gómez, 2019-07-22 This volume was first published by Inter Disciplinary Press in 2016 The present volume gathers a selection of texts that attempt to contribute to the critical reflection about digital arts and the social cultural context in which they arise However this book is not a systematic study about digital arts which thoroughly covers their history or their aesthetic and discursive principles Instead the five chapters hereby presented work as a sample of the multiple perspectives and approaches from which is possible to address this topic and to claim fresh insights for its further research The authors of this volume explore some of the challenges and possibilities offered by the intersections between art technology and society both for the fields of contemporary art and for the articulation of the social cultural models of the current Digital Age Thus digital arts are approached here not only as an object of study but also implicitly or explicitly as a tool for analyzing our contemporary reality **The Psychological and Physiological Benefits of the Arts**
