Covington, 2025-02-28 A gender-responsive trauma-informed treatment program for mental health, addiction, and domestic violence professionals working within the criminal justice system. Beyond Violence: A Prevention Program for Justice-Involved Women and Gender-Diverse People is the revised and expanded version of the evidence-based Beyond Violence 2013. The expansion includes additional sessions focusing on suicide prevention, parenting relationships in prison, and gender diversity. This treatment program is specifically developed for those who have committed aggressive or violent crimes and are in prisons, jails, and community correctional settings. The curriculum applies the Social Ecological Model to understand violent impulses and their management. This same conceptual model is used by the Centers for Disease Control and Prevention and by researchers affiliated with the Prison Rape Elimination Act (PREA). This four-level violence prevention model considers the complex interplay between individual, relationship, community, and societal factors. It addresses key issues that put women at risk of experiencing or perpetrating violence. The Beyond Violence program consists of 27 group sessions. Facilitators receive the background information and content necessary to lead practical and effective sessions, and the Participant Workbook allows women to process, record, and refer back to their therapeutic group experiences. By the end of the program, participants will have new skills in communication, conflict resolution, de-escalation, decision-making, and self-soothing. They

also will have a newfound understanding of themselves their backgrounds and the paths forward in their lives Power Metal Vince Beiser,2024-11-19 The powerful ways the metals we need to fuel technology and energy are spawning environmental havoc political upheaval and rising violence and how we can do better An Australian millionaire s plan to mine the ocean floor Nigerian garbage pickers risking their lives to salvage e waste A Bill Gates backed entrepreneur harnessing AI to find metals in the Arctic These people and millions more are part of the intensifying competition to find and extract the minerals essential for two crucial technologies the internet and renewable energy In Power Metal Vince Beiser explores the Achilles heel of green power and digital technology that manufacturing computers cell phones electric cars and other technologies demand skyrocketing amounts of lithium copper cobalt and other materials Around the world businesses and governments are scrambling for new places and new ways to get those metals at enormous cost to people and the planet Beiser crisscrossed the world to talk to the people involved and report on the damage this race is inflicting the ways it could get worse and how we can minimize the damage Power Metal is a compelling glimpse into this disturbing yet potentially promising new world *The Roxburghe Ballads with Short Notes by Wm.
