The Consonants of the (western) Cretan Dialect A Phonetic and Phonological Analysis

The Cretan dialect, one of the most distinct regional Greek dialects, has been examined by a very limited number of studies. Research concerned with the phonetics and phonology of the dialect is even more scarce and mainly impressionistic. The aim of this project is to provide, using acoustic analysis techniques, a phonetic and phonological description of the consonants that occur in the dialectal variety spoken in western Crete.

Project objectives

- Record dialectal materials in conversational and read speech containing consonants in a variety of contexts.
- Describe the phonemic inventory of consonants and their allophones.
- List phonological phenomena that provide valuable information on phonological processes absent in Standard Modern Greek, such as extreme palatalization and (affrication of velar consonants and delateralization and retroflexion of /r/ before back vowels).
- Document the dialect of Crete and assist its rescuing since it is an undeniable fact that some phonetic and phonological features that characterise the dialect are mainly retained by older speakers in the villages of Crete.
- Disseminate our results in both academic and non-academic audiences with the goal of showing the richness of spoken Greek.
- Provide a baseline for further research on the phonetics and phonology of the Cretan dialect (e.g. examination of eastern Cretan dialect, examination of vowels and intonation).

Notes on Eastern Cretan Phonology Kimmo Granqvist, 1997 *Culture and Society in Crete* Liana Giannakopoulou, E. Kostas Skordyles, 2018-06-11 Crete has always attracted the interest of scholars in modern times not only because of the archaeological discoveries of Sir Arthur Evans but also because of its rich history and the particular cultural traits and traditions resulting from the fact that the island has been at the centre of geographical cultural and religious crossroads The fifteen papers included in this volume explore original aspects of the Cretan cultural and historical tradition give original insights into already established fields and underline from the vantage point of their own particular discipline its distinctive character and impact As a result of such a thematic variety this volume will be of interest not only to scholars and students of modern Greek studies but also Renaissance Studies comparative literature cultural and social history and anthropology and travel literature as well as historical linguistics and dialectology

Words as Events Venla Sykärri, 2011-02-01 Words as Events introduces the tradition of short communicative rhyming couplets the *mantinades* as still sung and recited in a variety of performance situations on the island of Crete Recently these poems have also entered modern mass media and they are widely being exchanged as text messages by Cretans Focusing on the multi functionality of the short form Sykärri demonstrates how the traditional register gives voice to individual experiences in spontaneous utterances The local focus on communicative economy and artistry is further examined in a close analysis of the processes and ideals of composition By analyzing how the restrictions of form and performative conventions in fact generate impulses of creativity the author creates a theoretical approach that is sensitive to the special characteristics of the short rhymed poetic traditions In this interdisciplinary study the reader is invited to become familiar with the current folklore theory of oral poetry which has a long tradition in Finland The author combines the results of earlier folkloristic and anthropological insights and extends the theoretical concerns further to address questions of spontaneity and individual agency The research data has been produced in communicative interactions during long term fieldwork As a result the short rhymed poetry often neglected by scholars in earlier research paradigms can now be seen in new light specifically as dialogic poetry through its extended multi layered dialogic qualities
