Nothing And Non Existence The Transcendence Of Science:

Nothing and Non-existence--the Transcendence of Science William B. Turner,1986 *Transcendence in Heidegger's Early Thought* Erik Kuravsky,2023-11-27 This book demonstrates how Heidegger's departure from ontotheology occurs initially as a preparation for the concept of Dasein's transcendence and subsequently as its explicit development and overcoming. Dasein's transcendence is revealed as the foundation for the subsequent concept of Being as an Event which stands in contrast to all ontotheological perspectives that assert a singular a priori foundation of the universe attributed to beings. God, consciousness or even an independent process of Being that doesn't rely on Dasein. The book illustrates that transcendence is not an attribute of human consciousness or a connection to something external to it. Instead, as a primal act, transcendence paves the way for a non-representational dwelling in the essence of a historically unfolding Being, a contemplative recollection of the truth of Being. Throughout the book, there is a gradual progression towards an understanding of transcendence as an active engagement wherein we do transcendence. This process involves a reconstruction of the ontological significance of action, emphasizing its performative embeddedness in existence and its inseparability from Being.

The Transcendence of the Ego , Being and Nothingness Jean-Paul Sartre,2021-09-07 one of the greatest philosophical works of the twentieth century. In it, Sartre offers nothing less than a brilliant and radical account of the human condition. The English philosopher and novelist Iris Murdoch wrote to a friend of the excitement: "I remember nothing like it since the days of discovering Keats and Shelley and Coleridge." What gives our lives significance, Sartre argues, in *Being and Nothingness* is not pre-established for us by God or nature but is something for which we ourselves are responsible. Combining this with the unsettling view that human existence is characterized by radical freedom and the inescapability of choice, Sartre introduces us to a cast of ideas and characters that are part of philosophical legend: anguish, the bad faith of the memorable waiter in the café, sexual desire and the look of the other brought to life by Sartre's famous description of someone looking through a keyhole. Above all, by arguing that we alone create our values and that human relationships are characterized by hopeless conflict, Sartre paints a stark and controversial picture of our moral universe, one that resonates strongly today. This new translation includes a helpful Translator's Introduction, notes on the translation, a comprehensive index, and a foreword by Richard Moran. Sartre's Radicalism and Oakeshott's Conservatism A. Farr,1998-03-01 If man has no nature, if our intellect and understanding are products of our own activities, do we possess a key to self-modification? Are we free to re-make mankind? Sartre champions the romantic idea that we can, by sheer determination, begin afresh. Oakeshott is struck by the vandalism of such a project; he seeks to defend political culture from degradation by meddling academics. The Radical and Conservative understanding of social order and the human self are compared in this in-depth analysis of two contrasting philosophies.

Transcendence and Self-Transcendence Merold Westphal, 2004-07-16 The question of the transcendence of God has traditionally been thought in terms of the difference between pantheism which affirms that God is wholly within the world and theism which affirms that God is both within and outside the world both immanent and transcendent Against Heidegger's critique of onto theology and

the general postmodern concern for respecting and preserving the difference of the other Merold Westphal seeks to rethink divine transcendence in relation to modes of human self transcendence Touching upon Spinoza Hegel Augustine Pseudo Dionysius Aquinas Barth Kierkegaard Levinas Derrida and Marion Westphal's work centers around a critique of onto theology the importance of alterity the decentered self and the autonomous transcendental ego Westphal's phenomenology of faith sets this book into the main currents of Continental philosophy of religion today *Heidegger's Being and Time* Richard Polt, 2005-09-15 Heidegger's Being and Time Critical Essays provides a variety of recent studies of Heidegger's most important work Twelve prominent scholars representing diverse nationalities generations and interpretive approaches deal with general methodological and ontological questions particular issues in Heidegger's text and the relation between Being and Time and Heidegger's later thought All of the essays presented in this volume were never before available in an English language anthology Two of the essays have never before been published in any language Dreyfus and Guignon three of the essays have never been published in English before Grondin Kisiel and Thom and two of the essays provide previews of works in progress by major scholars Dreyfus and Kisiel *Secularism and the Pursuit of Transcendence, Volume II* Stanley E. Porter, Wendy J. Porter, 2025-02-19 We live in a secular age or so we have been told Nevertheless the Christian church strongly believes that we still experience and in fact are surrounded by acts of transcendence encounters with God that often defy imagination and explanation And yet we do try to explain such phenomena whether theologically experientially biblically historically philosophically literarily or even or especially artistically These two volumes are more than just papers from a major conference on secularism and the pursuit of transcendence held at McMaster Divinity College in Hamilton Ontario They contain genuine attempts by people deeply engaged with their secular surroundings to explain what we mean by transcendence Transcendence has been a longstanding topic among the best thinkers of this and previous ages and the same is true for these volumes which include contributions by Charles Taylor Robert Wuthnow Merold Westphal and Christina Gschwandtner but also by a wide range of others who address the question from divergent vantage points The responses vary as much as the orientations of those involved in the pursuit of defining not only what it means to live in our secular age but to be involved in the pursuit of transcendence or even to perceive the Transcendent's pursuit of us **Philosophers of Nothingness** James W. Heisig, 2001-05-01 The past twenty years have seen the publication of numerous translations and commentaries on the principal philosophers of the Kyoto School but so far no general overview and evaluation of their thought has been available either in Japanese or in Western languages James Heisig a longstanding participant in these efforts has filled that gap with Philosophers of Nothingness In this extensive study the ideas of Nishida Kitaro Tanabe Hajime and Nishitani Keiji are presented both as a consistent school of thought in its own right and as a challenge to the Western philosophical tradition to open itself to the original contribution of Japan Nothingness, Negativity, and Nominalism in Shakespeare and Petrarch Benjamin Boysen, 2020-11-09 Being exposed to the Nominalist expansion in early modernity

Petrarch and Shakespeare are highly preoccupied with a Nominalist dimension of language and representation. Against this background, the study shows how these Renaissance poets advanced a special notion of subjectivity and identity as rooted in negativity, otherness, and representation. The book thus argues for a new understanding of negative modes of subjectivity in Petrarch and Shakespeare. A new and sharpened understanding emerges from an interpretation of Francesco Petrarch's notion of exile and of love in his great poetical cycle *Rerum vulgarium fragmenta*, as well as a meticulous examination of the concept of nothingness in William Shakespeare's works. Petrarch and Shakespeare poetically show how identity is alien and decentred yet also free and expanding. In other words, these poets illustrate how subjectivity is constituted by heterogeneity. Moreover, pointing to other examples of this negative subjectivity in Renaissance philosophy and poetry, the study suggests that these models for subjectivity could be extended to other early modern writers. Heidegger William J.

Richardson, 2013-12-20 This book, one of the most frequently cited works on Martin Heidegger in any language, belongs on any short list of classic studies of Continental philosophy. William J. Richardson explores the famous turn *Kehre* in Heidegger's thought after *Being in Time* and demonstrates how this transformation was radical without amounting to a simple contradiction of his earlier views. In a full account of the evolution of Heidegger's work as a whole, Richardson provides a detailed, systematic, and illuminating account of both divergences and fundamental continuities in Heidegger's philosophy, especially in light of recently published works. He demonstrates that the thinking of *Being* for the later Heidegger has exactly the same configuration as the radical phenomenology of the early Heidegger, once he has passed through the turning of his way. Including as a preface the letter that Heidegger wrote to Richardson and a new writer's preface and epilogue. Facticity and the Fate of Reason After Kant is the first history of the concept of facticity. G. Anthony Bruno argues that this concept's coining, transmission, and repurposing by post-Kantian thinkers leaves a lasting divide concerning the question of whether a science of intelligibility can tolerate brute facts. In the phenomenological tradition, facticity denotes undeducibly brute conditions of intelligibility such as sociality, mortality, and temporality. This suggests an affirmative answer to the post-Kantian question. However, the term's original use in the German idealist tradition is associated with a negative answer: a science of intelligibility must eliminate bruteness in order to be systematic, as Fichte says, or presuppositionless, as Hegel says. Moreover, eliminating bruteness requires a new logic for deducing conditions of intelligibility from reason's self-contradictions: a dialectical logic that Fichte invents and Hegel develops. In response to the German idealists, Heidegger argues that dialectic ineluctably presupposes brute facts of lived experience whose interpretation requires a hermeneutics of facticity. The untold history of the concept of facticity thus contains the deepest parting of the ways after Kant, one in which reason is fated to transform from the hand that holds the world to the thrown activity of being in the world. **Facticity and the Fate of Reason After Kant** explores this transformation while confronting our inheritance of the still pressing post-Kantian

question Paths to Transcendence Reza Shah-Kazemi,2006-02-22 In our day when there is much strife between factions this work illuminates the theme of transcendence as understood by the saints of the religious traditions Hinduism Islam and Christianity **Process, Praxis, and Transcendence** James L. Marsh,1999-01-28 Process Praxis and Transcendence is a North American philosophy of liberation that defends both metaphysics and philosophy of religion The book moves from an existential phenomenology of the knowing and choosing subject through affirmation of a processive and liberating Christ to a critique and overcoming of neo imperialism Its ultimate theme explores what the appropriate theory and praxis of liberation is for those of us living in the center of the empire in North America and Western Europe **Cybersemiotics** Soren Brier,2008-05-10 A growing field of inquiry biosemiotics is a theory of cognition and communication that unites the living and the cultural world What is missing from this theory however is the unification of the information and computational realms of the non living natural and technical world Cybersemiotics provides such a framework By integrating cybernetic information theory into the unique semiotic framework of C S Peirce S ren Brier attempts to find a unified conceptual framework that encompasses the complex area of information cognition and communication science This integration is performed through Niklas Luhmann s autopoietic systems theory of social communication The link between cybernetics and semiotics is further an ethological and evolutionary theory of embodiment combined with Lakoff and Johnson s philosophy in the flesh This demands the development of a transdisciplinary philosophy of knowledge as much common sense as it is cultured in the humanities and the sciences Such an epistemological and ontological framework is also developed in this volume Cybersemiotics not only builds a bridge between science and culture it provides a framework that encompasses them both The cybersemiotic framework offers a platform for a new level of global dialogue between knowledge systems including a view of science that does not compete with religion but offers the possibility for mutual and fruitful exchange
