*Nothing But History* David D. Roberts, 1995 An admirable accomplishment Roberts provides valuable insights into the current debate on the nature of historical knowledge in our present postmodern time Anyone concerned with the philosophy of history will need to reckon with this book Allan D Megill author of *Prophets of Extremity* *Nothing But History* David D. Roberts, 2007 What is the role of history in our postmetaphysical age Surveying two centuries of philosophical writing David Roberts offers a thoughtful guide to the philosophy of history before the recent challenges associated with deconstructive postmodernism He then argues for a moderate intellectual tradition in which historical knowledge although freed from transcendent values continues to play a crucial role in the conduct of human affairs Roberts s careful account of historicism explores the ideas of its major nineteenth century representatives and foils including Hegel Dilthey and Nietzsche His thorough consideration of such twentieth century thinkers as Gadamer Croce Foucault and Heidegger contributes vitally to the ongoing discussions about the use and abuse of history Certain to engage historians and philosophers this book will interest scholars across the humanities who are concerned with the present and future utility of historical thinking **The**

**Houses of History** Anna Green, Kathleen Troup, 1999 An introduction to the major theoretical perspectives employed by twentieth century historians Incorporates a range of approaches to the writing of history giving accounts of eleven schools of thought Each chapter begins with a description of the ideas integral to the particular theory which are then explored

Historical Theory Mary Fulbrook, 2003-10-04 A highly original argument about the fact or fiction debate which takes a fresh look at major debates on the nature of history and the dilemmas facing historians today Friedrich Nietzsche and the Politics of History Christian Emden, 2008-05-08 This book explores Friedrich Nietzsche s understanding of modern political culture and his position in the history of modern political thought Surveying Nietzsche s entire intellectual career from his years as a student in Bonn and Leipzig during the 1860s to his genealogical project of the 1880s Christian Emden contributes to a historically informed discussion of Nietzsche s response to the political predicaments of modernity and sheds new light on the intellectual and political culture in Germany as the ideals of the Enlightenment gave way to the demands of the modern nation state This is a distinguished addition to the series of Ideas in Context and a major reassessment of a philosopher and aphorist whose stature among post enlightenment European thinkers is now almost unrivalled The Routledge Companion to Historical Studies Alun Munslow, 2006-02-01 The Routledge Companion to Historical Studies provides a much needed critical introduction to the major historians and philosophers together with the central issues ideas and theories which have prompted the rethinking of history that has gathered pace since the 1990s With twenty nine new entries and many that have been substantially updated key concepts for the new history are examined through the ideas of leading thinkers such as Kant Nietzsche Croce Collingwood White Foucault and Derrida and subjects range over class empiricism hermeneutics inference relativism and technology New entries for the second edition include Carl Becker Frank

R Ankersmit Jean Francois Lyotard gender justified belief the aesthetic turn race film biography cultural history critical theory and experimental history With a revised introduction setting out the state of the discipline of history today as well as an extended and updated bibliography this is the essential reference work for all students of history *The Longing for Total Revolution Reconsidered* Jeffrey Friedman, 2022-11-10 In *The Longing for Total Revolution* Philosophic Sources of Discontent from Rousseau to Marx and Nietzsche 1986 the eminent intellectual historian and political theorist Bernard Yack offered a sweeping reinterpretation of modern thought Yack argued that Rousseau prompted a line of philosophy that continued through Kant Hegel Marx and Nietzsche which viewed the essential spirit of modernity as dehumanizing and therefore implied in a matter that became increasingly clear over time that a total revolution against modernity is necessary In this volume seven political theorists and historians including Yack himself reconsider the book's substantive and methodological innovations its limitations and its current relevance Contributors to the volume discuss inter alia left Kantianism in historical context the theological origins of the longing for total revolution the question of whether the tradition identified by Yack is connected to twentieth century totalitarianism and the unique form of critical genealogy pioneered by Yack's book The volume concludes with Yack's response to the other contributors chapters This book was originally published as a special issue of the *Critical Review*

**The Expressionist Turn in Art History** Kimberly A. Smith, 2017-07-05 During the period in which Expressionist artists were active in central Europe art historians were producing texts which also began to be characterized evocatively as expressionist yet the notion of an expressionist art history has yet to be fully explored in historiographic studies of the discipline This anthology offers a cross section of noteworthy art history texts that have been described as expressionist along with critical commentaries by an international group of scholars Written between 1912 and 1933 the primary sources have been selected from the published scholarship of both recognized and less familiar figures in the field's Germanic tradition Wilhelm Worringer Fritz Burger Ernst Heidrich Max Dvor Heinrich Wiffelin and Carl Einstein Translated here for the first time these examples of an expressionist turn in art history along with their secondary analyses and the book's introduction offer a productive lens through which to re-examine the practice and theory of art history in the early twentieth century

**Educational Experience as Lived: Knowledge, History, Alterity** William F. Pinar, 2015-02-11 In this volume Pinar enacts his theory of curriculum detailing the relations among knowledge history and alterity The introduction is Pinar's intellectual life history naming the contributions he has made to understanding educational experience Study is the center of educational experience as he demonstrates in the opening chapter The alterity of educational experience is evident in his conceptions of disciplinarity and internationalization interrelated projects of historicization dialogical encounter and recontextualization By reactivating the past not by instrumentalizing the present we can find the future explicated in his studies of the Eight Year Study the Tyler Rationale and the gendering and racialization of U S school reform The interrelation of race and gender is emphasized in the chapters on

Ida B Wells and Jane Addams The technologization of education is critiqued through analysis of the achievements of George Grant and Pier Paolo Pasolini The educational project of subjective and social reconstruction is explored through study of Musil's essayism a genre that corrects the problems accompanying ethnography and created by identity politics

**Historicism and Fascism in Modern Italy** David D. Roberts, 2007-10-27 During the early decades of the twentieth century Italy produced distinctive innovations in both the intellectual and political realms On the one hand Benedetto Croce 1866 1952 and Giovanni Gentile 1875 1944 spearheaded a radical rethinking of historicism and philosophical idealism that significantly reoriented Italian culture On the other hand the period witnessed the first rumblings of fascism Assuming opposite sides Gentile became the semi official philosopher of fascism while Croce argued for a renewed liberalism based on absolute historicism In *Historicism and Fascism in Modern Italy* David D Roberts uses the ideological conflict between Croce and Gentile as a basis for a wider discussion of the interplay between politics and ideas in Italy during the early twentieth century Roberts examines the connection between fascism and the modern Italian intellectual tradition arguing that the relationship not only deepens our understanding of fascism and liberalism but also illuminates ongoing dangers and possibilities in the wider Western world This set of twelve essays by one of the leading scholars in the field represents an authoritative view of the modern Italian intellectual tradition its relationship with fascism and its enduring implications for history politics and culture in Italy and beyond

**Integrity, Honesty, and Truth Seeking** Christian B. Miller, Ryan West, 2020-03-04 We tend to admire people who stay true to their convictions in the face of opposition who are not tempted to twist or withhold the truth for selfish reasons and who seek the truth even when it means giving up their cherished views Indeed integrity honesty and truth seeking are crucial virtues on both intimate and global scales significant in everything from our relationships to our politicians accountability The past forty years have witnessed a dramatic resurgence of philosophical interest in the virtues And yet there has been surprisingly little work among philosophers aimed at helping us better understand these three truth related virtues Edited by philosophers Christian B Miller and Ryan West this interdisciplinary volume significantly advances the discussion of integrity honesty and truth seeking by incorporating the insights and perspectives of experts in philosophy law communication and rhetorical studies theology psychology history and education Each of the volume's three sections is devoted to one virtue and comprises a conceptual chapter about the nature of the virtue in question an application chapter that explores the virtue's central role in an area of human life and a developmental chapter covering some of the ways people can foster the virtue Additionally the volume addresses experimental work on honest and dishonest behavior one of the fastest growing and most important research areas in the field of moral psychology today Every reader will come away from this volume with a deepened knowledge of and appreciation for the essential roles of these three virtues in our world and rich resources for developing and sustaining them in life

**Christology From Within and Ahead** Mark Chan, 2021-10-01 Troeltsch's struggle with historicism sets the stage

for a proposal that Christology be done from within and from ahead Gadamer's philosophical hermeneutics and Schleiermacher's experiential theology inform a Christology from within that is rooted in tradition and experience while Pannenberg's notion of proleptic eschatological fulfilment serves as resource for a Christology from ahead This volume develops a hermeneutical Christology that takes into account the historical contingency of knowledge and seeks a Christology beyond the objectivism of timeless truth and the relativism of absolutised contextuality The book is concluded with an examination of the convergence of critical traditionality experiential appropriation and eschatological prolepsis in the Christology of the apostle Paul The author explores how Christology might respond to the scandal of universality in postmodernity without defaulting on its claim to transcontextual referentiality

*Culture and Ideology under the Seleukids*

Eva Anagnostou-Laoutides, Stefan Pfeiffer, 2022-01-19 The volume offers a timely re appraisal of Seleukid cultural dynamics

While the engagement of Seleukid kings with local populations and the issue of Hellenization are still debated a movement away from the Greco centric approach to the study of the sources has gained pace Increasingly textual sources are read alongside archaeological and numismatic evidence and relevant near eastern records are consulted Our study of Seleukid kingship adheres to two game changing principles 1 We are not interested in judging the Seleukids as strong or weak whether in their interactions with other Hellenistic kingdoms or with the populations they ruled 2 While appreciating the value of the social imaginaries approach Stavrianopoulou 2013 we argue that the use of ethnic identity in antiquity remains problematic Through a pluralistic approach in line with the complex cultural considerations that informed Seleukid royal agendas we examine the concept of kingship and its gender aspects tensions between centre and periphery the level of acculturation intended and achieved under the Seleukids the Seleukid Ptolemaic interrelations As rulers of a multi cultural empire the Seleukids were deeply aware of cultural politics

**The Totalitarian Experiment in Twentieth Century Europe**

David Roberts, 2006-04-27 By developing a long term supranational perspective this ambitious multi faceted work provides a new understanding of totalitarianism the troubling common element linking Soviet communism Italian fascism and German Nazism The book's original analysis of antecedent ideas on the subject sheds light on the common origins and practices of the regimes Through this fresh appreciation of their initial frame of mind Roberts demonstrates how the three political experiments yielded unprecedented collective mobilization but also a characteristic combination of radicalization myth making and failure Providing deep historical analysis the book proves that totalitarianism best characterizes the common features in the originating aspirations the mode of action and even the outcomes of Soviet communism Italian fascism and German Nazism By enhancing our knowledge of what totalitarianism was and where it came from Roberts affords important lessons about the ongoing challenges possibilities and dangers of the modern political experiment

**Genetic Ethics** John Frederic Kilner, Rebecca Davis Pentz, Frank E. Young, 1997 This timely volume written by scholars and practitioners at the forefront of genetic research will help readers assess from a Christian perspective the ethical

questions raised by today's genetic advancements

**Deconstructing History** Alun Munslow, 2006 Surveying the latest research this welcome second edition of Alun Munslow's successful *Deconstructing History* provides an excellent introduction to the debates and issues of postmodernist history. This new edition has been updated and revised and along with the original discussion material and topics now assesses the claims of history as a form of truthful explanation, discusses the limits of conventional historical thinking and practice and the responses of the new empiricists to the book's central arguments, examines the arrival of experimental history and its implications, clarifies the utility of addressing Michael Foucault and Hayden White and strengthens the analysis of Frank R. Ankersmit's recent work. Along with an updated glossary and a revised bibliography, this second edition will not only live up to its predecessor's reputation but will surpass it as the most essential student resource for studying history and its practice.

**A Croce Reader** Massimo Verdicchio, 2017-05-08 Benedetto Croce was a historian, humanist, political figure and the foremost Italian philosopher of the early twentieth century. *A Croce Reader* brings together the author's most important works across the fields of aesthetics, philosophy, history, literary criticism and the Baroque and presents the other Croce that has been erased by scholarly tradition, including by Croce himself. Massimo Verdicchio traces the progress of Croce as a thinker, focusing on his philosophy of absolute historicism and its aesthetic implications. Unlike other anthologies, *A Croce Reader* includes essays from the *Aesthetics* of 1902 and key studies on Vico, Hegel and Pirandello. Verdicchio's masterful translation of the source material welcomes specialists and non-specialists alike to discover the other Croce for themselves.

**Toward a Pragmatist Philosophy of the Humanities** Sami Pihlström, 2022-12-01 Humanist scholars often feel the need to defend the humanities. The value of humanistic research is sometimes challenged as the cultural reality investigated by disciplines such as history, literary studies and theology may seem unclear. In particular, the ontology of the humanities might be considered obscure in comparison to the ontology of the natural sciences. *Toward a Pragmatist Philosophy of the Humanities* proposes to develop a comprehensive philosophical account of the humanities, focusing on the ontology and epistemology of humanistic inquiry from the standpoint of pragmatism. Sami Pihlström argues that humanistic cognitive pursuits can be interpreted along the lines of a pragmatist theory of inquiry, defending pragmatic realism about the humanities. However, far from leading to any reductive naturalization of the human world, the pragmatist philosophy of the humanities defended by Pihlström takes a distinctively Kantian critical turn in emphasizing the need for transcendental argumentation in the philosophy of the humanities, insisting on the irreducibly ethical dimensions of humanistic scholarship.

**The Experience of Human Communication** Frank J. Macke, 2014-12-24 This book deals with matters of embodiment and meaning; in other words, the essential components of what Continental thought since Heidegger has come to consider as communication. A critical theme of this book concerns the basic tenet that consciousness of one's Self and one's body is only possible through human relationship. This is, of course, the phenomenological concept of intersubjectivity. But rather than let this concept remain an abstraction by discussing it as

merely a function of language and signs this work attempts to explicate it empirically That is it discusses the manner in which from infancy to childhood and adolescence and the dawning of our sexual identities through physical maturity and old age we come to experience the ecstasy of what Merleau Ponty has so poetically termed flesh It is rarely clear what someone means when she or he uses the word communication An important objective of this book is thus to advance understanding of what communication is In academic discourse communication has come to be understood in a number of contexts some conflicting and overlapping as a process a strategy an event an ethic a mode or instance of information or even a technology In virtually all of these discussions the concept of communication is discussed as though the term s meaning is well known to the reader When communication is described as a process the meaning of the term is held at an operational level that is in the exchange of information between one person and another what must unambiguously be inferred is that communication is taking place In this context information exchange and communication become functionally synonymous But as a matter of embodied human psychological experience there is a world of difference between them As such this book attempts to fully consider the question of how we experience the event of human communication The author offers a pioneering study that advances the *raison d'être* of the emergent field of communicology while at the same time offering scholars of the human sciences a new way of thinking about embodiment and relational experience

**Truth Considered and Applied** Stewart E. Kelly, 2011 A classroom text for philosophy and theology students learning to defend Christianity with love and truth in the context of history and against the challenges of postmodernist thought
