Prophetic and Public Kristin E. Heyer, 2006-06-02 The United States was founded on a commitment to religious tolerance Based on this commitment it has become one of the most religiously diverse and religiously observant liberal democracies in the world Inherent in this political reality is the question What is the appropriate relationship between religious beliefs and public life This is not a new question but in contemporary US politics it has become a particularly insistent one In this intelligent wide ranging book Kristin Heyer provides new and nuanced answers Prophetic and Public employs the discourse of public theology to consider what constitutes appropriate religious political engagement According to Heyer public theology connects religious faith concepts and practices to their public relevance for the wider society Her use of public theology concepts to address the appropriate possibilities and limits for religious political engagement in the United States is both useful and enlightening Heyer approaches the relationship between public morality and religious commitment through the example of the Catholic Church She looks at two prominent Catholics Michael Baxter and Bryan Hehir as a way of discussing norms

for practice of public theology Heyer also analyzes case studies of three US Catholic advocacy groups The US Conference of Catholic Bishops NETWORK and Pax Christi USA Through her analysis she shows the various ways that the organizations Catholic identity impacts their social and political efforts From her investigations come norms that define possibilities and limits for political actions based on religious conviction This deeply thoughtful book examines what is truly fundamental and inescapable about public life and private religious belief in the United States In doing so it makes skillful use of the tools of theology philosophy law and advocacy to demonstrate that the Catholic Church reveals great diversity in its public theology providing legitimate options for a faithful response to urgent political issues

Modern Catholic Social Teaching Joe Holland,2003 The impact of the industrial revolution on the social structures of industrialized nations posed a difficult challenge to the Catholic Church and its Popes In the struggle for human and economic status should the Church side with the new working class or with capitalist barons who along with the old aristocracy identified themselves as upholders of Christian civilization In this history of papal social teaching Joe Holland tells how the popes at first backed the status quo Then with the accession of Pope Leo XIII in 1878 a seismic shift took place Leo s encyclical Rerum novarum was the first authoritative Church voice to declare that laboring people have rights the right to fair wages to decent living conditions the right to organize labor unions and even to strike Henceforth the notion of civilization at least for the Church would be grounded in the lives and aspirations of working people Modern Catholic Social Teaching traces this historic shift as it played out in the writings of Leo and the popes who followed him Pius X Benedict XV Pius XI and Pius XII These popes supported Leo s encyclical and even elaborated it as European history experienced the emergen
