Queer Roots for the Diaspora Jarrod Hayes, 2023-06-20 Employing rootedness as a way of understanding identity has increasingly been subjected to acerbic political and theoretical critiques Politically roots narratives have been criticized for attempting to police identity through a politics of purity excluding anyone who doesn t share the same narrative Theoretically a critique of essentialism has led to a suspicion against essence and origins regardless of their political implications The central argument of *Queer Roots for the Diaspora* is that in spite of these debates ultimately the desire for roots contains the roots of its own deconstruction The book considers alternative root narratives that acknowledge the impossibility of returning to origins with any certainty welcome sexual diversity acknowledge their own fictionality reveal that even a single collective identity can be rooted in multiple ways and create family trees haunted by the queer others patrilineal genealogy seems to marginalize The roots narratives explored in this book simultaneously assert and question rooted identities within a number of diasporas African Jewish and Armenian By looking at these together one can discern between the local specificities of any single diaspora and the commonalities inherent in diaspora as a global phenomenon This comparatist interdisciplinary study will interest scholars in a diversity of fields including diaspora studies postcolonial studies LGBTQ studies French and Francophone studies American studies comparative literature and literary theory

Primal Philosophy Lucas Fain, 2021-01-29 *Primal Philosophy* Rousseau with Laplanche presents the first comprehensive study of Rousseau s thought on the possibility of philosophy and the responsibility of the philosopher Through a close reading of texts from throughout Rousseau s entire corpus together with inspiration from Jean Laplanche s seminal work on the Freudian theory of seduction this book positions Rousseau within a contemporary debate involving Theodor Adorno and Alain Badiou on the fate of philosophy after Heidegger In confrontation with the radical subordination of ethics to ontology which is characteristic of Cartesian thought and its culmination in Heidegger s philosophical legacy the reading of Rousseau with Laplanche elaborates the rootedness of philosophy in a process of primal seduction which opens a way to rethink the meaning of a genuine first philosophy not as the study of being qua being in the tradition initiated by Aristotle but as primal philosophy the study of the genesis of philosophy itself The rootedness of philosophy in a process of primal seduction then reveals the primal responsibility of the philosopher a responsibility for human happiness found in the possibility of philosophy itself

Walter Benjamin for Children Jeffrey Mehlman, 1993-05-15 In Walter Benjamin for Children readers will encounter a host of intertextual surprises an evocation of the flooding of the Mississippi informed by the argument of The Task of the Translator a discussion of scams in stamp collecting that turns into The Work of Art in the Age of Mechanical Reproduction a tale of bootlegging in the American South that converges with the best of Benjamin's forays into fiction Mehlman superimposes a dual series of texts dealing with catastrophe on the one hand and fraud on the other and allows it to resonate with the false messianic theology of Sabbatianism as it came to focus the attention and enthusiasm of Benjamin's friend Gershom Scholem during the same years The radio scripts for children offer an unexpected byway on the eve of apocalypse into Benjamin's messianic preoccupations

The Inhuman Condition Rudi Visker, 2006-01-27 At the origin of this volume a simple question what to make of that surprisingly monotonous series of statements produced by our societies and our philosophers that all converge in one theme the importance of difference To clarify the meaning of the difference at stake here we have tried to rephrase it in terms of the two major and mutually competing paradigms provided by the history of phenomenology only to find both of them equally unable to accommodate this difference without violence Neither the ethical nor the ontological approach can account for a subject that insists on playing a part of its own rather than following the script provided for it by either Being or the Good What appears to be from a Heideggerian or Levinasian perspective an unwillingness to open up to what offers to deliver us from the condition of subjectivity is analysed in these pages as a structure in its own right Far from being the wilful indifferent and irresponsible being its critics have portrayed it to be the so called postmodern subject is essentially finite not even able to assume the transcendence to which it owes its singularity This inability is not a lack it points instead to a certain unthought shared by both Heidegger and Levinas which sets the terms for a discussion no longer our own Instead of blaming Heidegger for underdeveloping being with we should rather stress that his account of mineness may be in the light of contemporary philosophy what stands most in need of revision And instead of hailing Levinas as the critic whose stress on the alterity of the Other corrects Heidegger's existential solipsism the problems into which Levinas runs in defining that alterity call for a different diagnosis and a corresponding change in the course that phenomenology has taken since Instead of preoccupying itself with the invisible we should focus on the structures of visibility that protect us from its terror The result An account of difference that is neither ontological nor ethical but in ontological and that can help us understand some of the problems our societies have come to face racism sexism multiculturalism pluralism And in the wake of this an unexpected defence of what is at stake in postmodernism and in the question it has refused to take lightly who are we Finally an homage to Arendt and Lyotard who if read through each other's lenses give an exact articulation to the question with which our age struggles how
