Blaustein, 2013-06-29 This text is written for the obstetrician gynecologist pathologist and for residents training in these disciplines It is a multi authored book and the editor is aware of the problems this can create but the expansion of information in the field of gynecologic pathology renders single authorship obsolete The format is largely traditional but the contents include topics that have not appeared in past texts Clear cell adenocarcinoma of the vagina and vaginal and cervical adenoses are discussed in detail in a separate chapter A chapter on embryology and congenital anomalies is written by an embryologist and the advantage of its inclusion is self evident Ovarian neoplasms in childhood and adolescence are fortunately rare occurrences but information concerning them is generally not readily available in existing texts It is of sufficient importance to deserve a separate chapter Amniotic fluid analysis for fetal viability is now commonly used and for this reason a detailed discussion of this subject is presented A chapter is included on gross description and preparation of gynecologic specimens It contains the input and review of several directors of gynecologic pathology laboratories
